ATTENDING: Doniele Andrus, Sean Garrigan, Timothy Stromberg, Bret Hollern, Steering Committee Members, & Attending Public
Note: See attached Kick-off Meeting & Public Meeting sign-in sheet for list of steering committee members & Attending Public.

SUBJECT: Steering Committee Meeting #2

❖ General Comments

- CSX will be removing the closed pedestrian bridge at Chestnut Street in Coraopolis as part of the National Gateway project. The question was raised regarding if this might provide an opportunity to discuss safety improvements at other existing at-grade crossings.
- The Sport Legacy Foundation currently owns the Montour Junction Property. It is anticipated that during the next several weeks (by the end of March) the property ownership will be transferred to Allegheny County.
- Survey questionnaires should be sent out to each municipality managers and/or administrative office secretary in order for them to distribute among key interest groups and school systems in each municipality.
- Potential Interest Group Surveys –
 - Student questionnaires to Beaver County Community College
 - Employer regarding the feasibility of using the bike trail for commuting to and from work
- When asked the question “how do you foresee the Ohio River Trail impacting/improving each community?” It was a little hard to envision the impact without knowing the defined trail alignment. The question could be better answered when a known desired trail alignment has been proposed. For some it was felt that the trail would likely have minimal economic impact but would benefit the quality-of-life of the residents.
- A large volume of users on the north end of Montour Trail, are from the North Hills area
- Local high school cross country teams currently use the Montour Trail for training
- Doniele mentioned that she just received bicycle commuter traffic counts
- There is a Monaca resident that runs along Constitution Ave. daily
