

OHIO RIVER TRAIL FEASIBILITY STUDY

April 9, 2010

VISION STATEMENT AND PROJECT GOALS [Revised]

Ohio River Trail Vision Statement: The communities of: The City of Aliquippa, Monaca Borough, Center Township, Hopewell Township, South Heights Borough, Crescent Township, Moon Township and Coraopolis Borough will all be interconnected by a contiguous linear trail spine that links these communities with local and regional trail networks in an effort to support each community's desire to promote economic development, expand transportation options, provide additional recreation opportunities and enhance the overall quality-of-life for all residents.

Project Goals:

Goal #1: Establish the Spine- Establish a dedicated linear trail, paralleling and as close to the Ohio River as possible, from the existing Montour Trail to the Ohio River bridge crossing in Monaca Borough.

Goal#2: Maximize the Overall Potential Community, Transportation and Economic Impact-Design a trail in a manner that best serves the needs of regional users, businesses, employers, and property owners.

Goal #3: Make Physical Progress in Both the Short and Long Terms-Determine the most viable route for a linear trail or network of trail segments that can be implemented within the shortest period of time and identify the preferred ultimate alignment, that can be created over time.

Goal #4: Develop a Bicycle and Pedestrian Friendly Culture throughout Each of the Communities - Identify a trail feeder system of on-street bicycle and pedestrian connectivity in order to maximize the ability of local residents to access the trail and the riverfront and also provide a means for regional users to reach local businesses, destinations and attractions.

Goal #5: Reconnect the Community to the River's Edge – Utilize the trail as an impetus for a regional greenway network of diverse publicly accessible lands, parks, recreation facilities and historic and cultural activity settings/sites along the Ohio River –i.e. make the Ohio River edge as publicly accessible as possible within each community and as a linear greenway network, while balancing the needs for preserving existing and future redevelopment.
