

OHIO RIVER TRAIL FEASIBILITY STUDY - Meeting Notice

Project Steering Committee Kick-off Meeting

The project Steering Committee Kick-off Meeting for the Ohio Trail Feasibility Trail Study will occur on **Wednesday, January 6, 2009 at 10 am at the Hopewell Municipal building**. Please see the attached agenda for the items to be discussed at the meeting. The primary goal of this meeting will be to introduce the Steering Committee and Project Team members, review the scope of the study and discuss key next steps.

In preparation for this meeting, we are requesting if possible, that you bring a few items with you to the meeting. We will be assembling a comprehensive stakeholder list for the project which will assist in insuring that all interested parties receive formal notices of upcoming public meetings. If you know of individuals from your community that have a special interest in this project, please provide their name and contact information. Interested individuals could include biking or trail advocates, interested business owners, strategic property owners, etc. We will also use this list to identify key persons for individual interviews. If there is someone you feel is especially important that we talk to because of their intense interest in the project or specific knowledge base, please let us know.

It also important to have a comprehensive understanding of the opportunities, constraints and future plans for each of the communities in which the trail will be located. Below is a list of materials we are interested in reviewing, if they are available, as part of our background research. If you cannot bring a copy of the document with you, a verification of which documents exist for your community or group and where we can get access to them will be very helpful.

Existing plan documents (no matter how old) for the project and each of the communities:

1. Comprehensive plans
2. Park and recreation plans and park specific master plans
3. Urban revitalization plans
4. A list of any known pending or approved site development plans along the corridor
5. Economic studies or data
6. Traffic studies or intersection improvement plans
7. List of known PennDOT or County Road/ Bridge Projects
8. PA Act 167 Stormwater Management Plans
9. Planned stormwater or flood control improvements projects in the corridor
10. Property information for the major properties along the corridor or between the corridor and the river, (such as phase 1's)
11. Any other items you feel might be pertinent

Please feel to email any questions or information you have in advance of the meeting to:
