# **We Like Bikes**

**How You and Your Bike  
Can Ride With Us.**

**Ride On** Riding your bike is good for your health, your wallet and the environment.

And in case you didn't know, you're good to go on Port Authority's bike-friendly vehicles. You can stow your two-wheel, non-motorized bike free on board designated Port Authority buses, the T, and even the Mon Incline. So you can pedal as far as you want to work, school, or the trail, and ride the rest of the way.

**Rails to Trails** Coast isn't just a stop on the T. Whether you're heading to one of the area's great parks or bike trails or doing some urban exploring, leave your car at home and coast part way on the T. Use the seating area reserved for people with disabilities, if it's available, and firmly hold your bike at all times. Two bikes per light rail vehicle, please.

**Mountain Biking** We're inclined to take you up and down. Next time you're going up or down Mt. Washington, don't push your muscles or your brakes to the limit. The Monongahela Incline has room for one bike. So you can save your energy for slightly less vertical terrain.

Bike service for the T and incline is available seven days a week during off-peak hours (not available weekdays 6-9am and 4-6:30pm). Buses with bike racks can be utilized anytime. Please be thoughtful of other passengers.

**Rack 'n Roll** Commuting to work, getting to class, or taming the urban landscape is a lot easier when you don't have to contend with Pittsburgh's famous steep hills, tunnels and bridges. The following bus routes, which lead to some of the most popular destinations for bikers, are equipped with easy-to-use front bike racks that can hold two bicycles (two-wheeled, non-motorized bike).

**11D** Perrysville

**21A** Coraopolis

**26A** Ingram-Sheraden

**26D** Chartiers City

**54C** North Side-Oakland-South Side

**56C** McKeesport-Lincoln Place

**59U** South Side Works-Oakland-Waterfront

**71A** Negley

**77D** Highland-Friendship

**77F** Morningside-Friendship

**77G** Stanton Heights-Friendship

**500** Highland Park-Bellevue

**Here are some helpful and important guidelines to follow...**

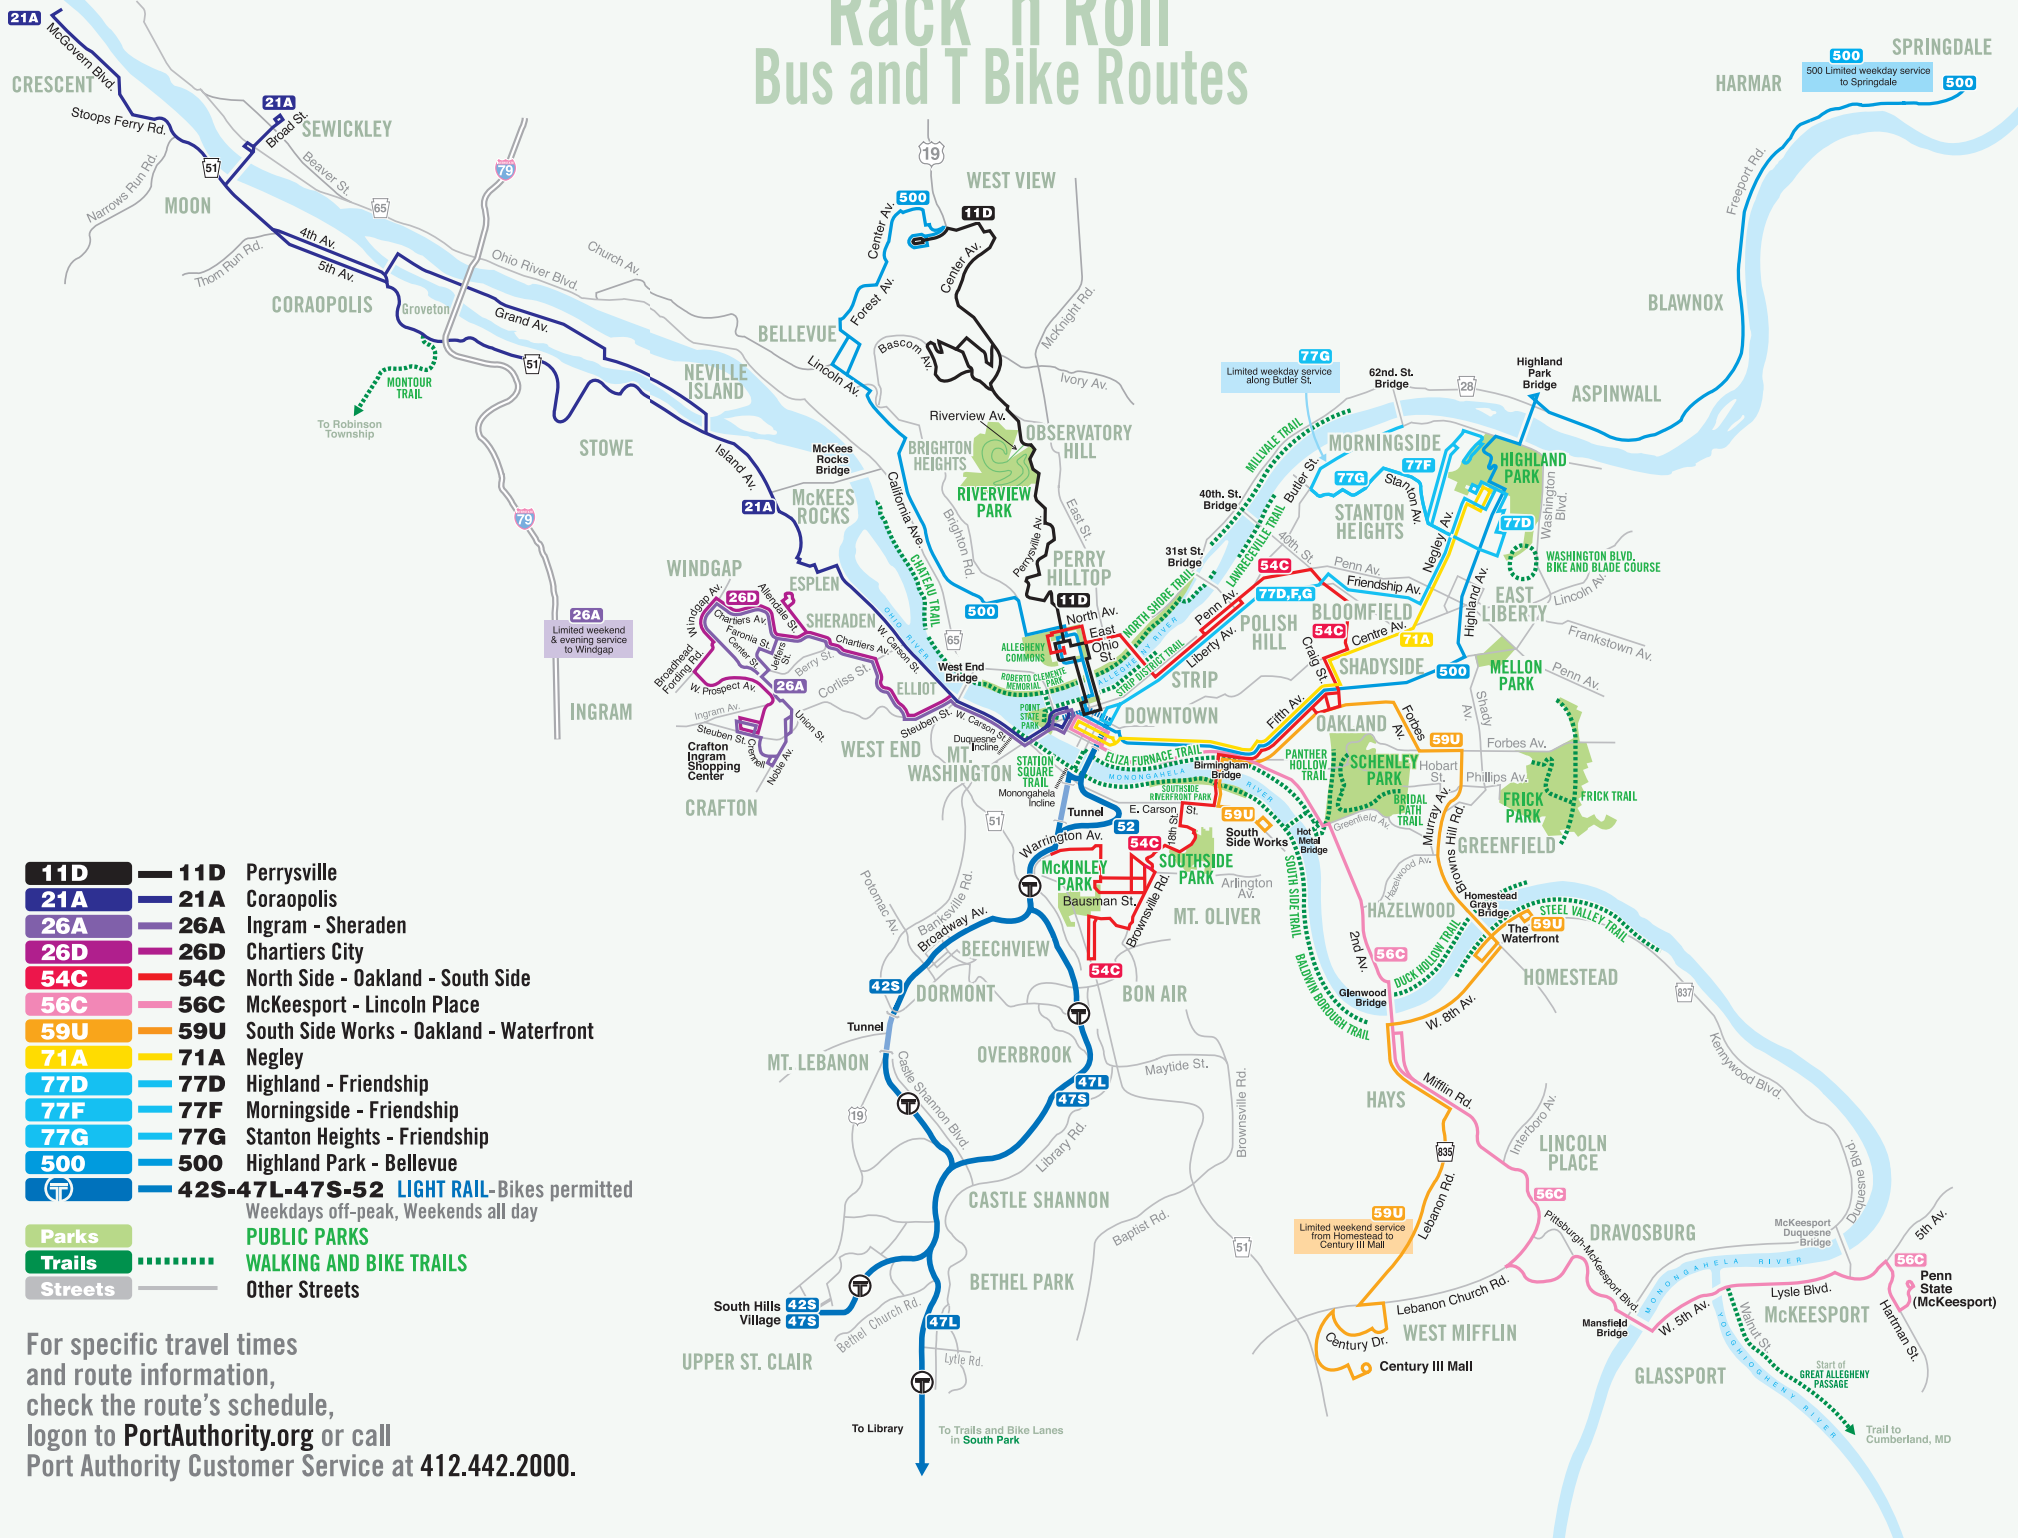

- Stand by your bike at the bus stop so the driver knows you intend to board.
- Tell the driver you'll be loading your bike.
- Remove loose items like water bottles, pumps, etc.
- Load and unload your bike from the curb or in front.
- Place the wheels in the proper slots which are clearly labeled.
- Raise and secure the support arm over the top of the tire.
- Sit near the front of the bus.
- As you approach your stop, tell the driver you'll be unloading your bike.
- You are responsible for your bike; the driver is not permitted to help load or unload your bike.

**Exercise Your Options** Let Port Authority be part of your bike route and have a more convenient and relaxing ride. To find out more, talk to a customer service representative at **412.442.2000** or logon to the Port Authority Web site, **PortAuthority.org**. On the site, you will find a myriad of information regarding Port Authority's bike-friendly vehicles. Also, you will find a demonstration video of how to use a bike rack.

**We're Multimodal** Port Authority's First Avenue T Station is a multimodal transit center which hundreds of people in Downtown Pittsburgh use each day. Conveniently located next to the Eliza Furnace Trail, Port Authority customers can take their bikes from rail to the trail in just minutes. The 56C McKeesport-Lincoln Place bike rack route also serves the T station and trail. The enclosed map offers a variety of other bus/rail-to-trail options, making it easy for you to Rack 'n Roll.
