Pennsylvania Regional Wayfinding Signing Program

The Pennsylvania Tourism Signing Trust “administered by Pennsylvania Logos LLC” is responsible for the design and implementation of the Pennsylvania Regional Wayfinding Signing program. Wayfinding signage is for the non-interstate, non-limited access roads in Pennsylvania. The objectives of the program are to:

- Elevate PA’s image as a tourism destination through consistent and vibrant brand imagery.
- Present road users with dependable tourism signage information.
- Implement a customer service approach to the management and delivery of tourism signage.

Wayfinding signs reach an engaged, targeted audience that is ready to buy. Signs reach people when they are already on the road and ready to make purchases. A worthwhile investment to get visitors out of their cars and into your business.

Frequently Asked Questions

Q: Why is Pennsylvania launching a Wayfinding Signing Program?

A: Signs help people find their way. They guide travelers to places they want to go and help them discover off-the-beaten-path places they never knew existed. But iconic signs not only help visitors find local businesses and attractions, they also help businesses find customers.

Q: Where are the Wayfinding Signs placed?

A: Wayfinding signs are located on both state and municipal roadways, but are not on interstates or limited access four lane highways. Sign design allows a maximum of three mentions per sign and incorporates the official state tourism branding.

Q: How much will it cost to participate in the Pennsylvania Wayfinding Signing Program?

A: Participation fees can be found on www.palogo.org.

Q: How will the signs be maintained?

A: All maintenance will be coordinated by Pennsylvania Logos LLC or its contractors.

Q: What will happen to my TODS (Tourist-Oriented Directional Sign)?

A: With the implementation of the Wayfinding Signing Program, no new requests for traditional Tourist-Oriented Directional Signs (TODS) will be accepted by the Pennsylvania Department of Transportation. All traditional TODS within a region where wayfinding signs are installed will be removed as wayfinding signs are installed.
