Vince,

I received a call from John Kaercher, Freedom Borough Mayor, on Friday. He said council discussed your request for the launch site last week. He said they approved your request, but want to make you aware of several concerns that you should be aware of:

1. Access from Third Avenue to the river is not accessible.
2. Limited parking along Third Street, they were concerned that a weekend rowing event in Freedom would take up valuable parking from the other entities along Third Avenue. John responded to their concern by indicating that he thought that if there were to be a local event, ORTC would arrange for off-street parking at on the lots within the Borough. Otherwise he said he didn't anticipate that more than two or three vehicles at the most would park there at one time, most likely on a weekend.
3. Signage and rack will need to be coordinated with Borough and PennDOT. Borough owns the property and it is within the PennDOT right of way.

At the end of the conversation I asked if it was approved and if we could show it on the map and he said yes.

John
