Email: drtroia@ohiorivertrail.org www.ohiorivertrail.org

Dr. Troia:

FisherWorks Consulting is respectfully submitting a proposal to the Ohio River Trail Council for mapping, data gathering and finished guide layout requirements for the Ohio River Water Trail from the beginning of the Ohio River in Pittsburgh downstream to Newell, WV totaling approximately 63 stream miles including 17 miles of three tributaries.

Resulting from past experience and previous data collection for several other water trails, FisherWorks Consulting already possesses a great amount of digital information and experience needed for the Ohio River Water Trail.

It is exciting to see the amount of work and dedication that went into data gathering by the Ohio River Trail Council as demonstrated by the PowerPoint show provided to consultants with the RFP. I would be honored to work with the Ohio River Trail Council on this project.

FisherWorks Consulting has done nine water trail maps/guides working with nine separate committees. Judging from the PowerPoint slides, the Ohio River will be quite unique and require a great deal of experience to pull the massive amount of information together into a succinct and user friendly guide.

In addition to the many reasons I would love to work on this project, I am really looking forward to a reason to go though the locks in a sea kayak!

Sincerely,

Clark Fisher
Principal, FisherWorks Consulting

Cost Breakdown by Task Including all Overhead

Task Description	Hours/task	Cost/task
<i>hourly rate</i>	Clark Fisher \$50.00	
1. Existing and new GIS data compilation for PA, WV, and OH including packaging for delivery to the Ohio River Trail Council	75	\$3,750.00
2. Graphic design finished files map and text side	80	\$4,000.00
3. Map and text files suitable for website	40	\$2,000.00
4. Logo design	5	\$ 250.00
5. This proposal does not include print costs, but leaves \$5,000 of the Ohio River Trail Council total project budget for printing. Brad Clemenson with PEC is working out a deal with a printer for bulk water trail pricing and it may be possible for this project to be included. Either way, \$5,000 should print a lot of guides.		
Total: hours 200		
Total cost including all overhead (without printing)		\$10,000.00

Also volunteering approximately 40 hours of in-stream assessment.

Statement of Consultant Qualifications

Clark Fisher, the Principal for FisherWorks Consulting, is qualified to do the work as set forth in the Ohio River Trail Council RFP. Mr. Fisher has been working with Geographic Information Systems and other software packages creating water trail guides for more than ten years. Mr. Fisher has worked with several different committees and within several different formats. Water trail guides completed include: 1. Juniata River. 2. Raystown Branch Juniata River. 3. North Branch Susquehanna River. 4. Kiski-Conemaugh River overhaul and update. 5. Clarion River overhaul and update. 6. Youghiogheny River. 7. Tidal Delaware River. Also currently finishing up French Creek and Loyahanna Creek. Mr. Fisher has paddled every inch of these streams identifying features relevant to the guides.

Mr. Fisher has also been volunteering and working in the fields of land trail development, conservation, economic development and recreation development for over ten years.
