

Dr. Vincent Troia

Chief Executive Officer
Ohio River Trail Council
1100 Pennsylvania Avenue
Monaca, PA 15061

RE: Request for Proposals

Dear Dr. Troia,

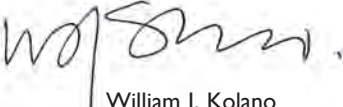

Kolano Design, in collaboration with GAI Consultants, is pleased to submit this proposal to the Ohio River Trail Council for the Water Trail Map and Guide Preparation.

We understand that the total amount budgeted for this project, as stated in the Q&A, is \$15,000.00. Our proposal amount is for a bit more. We feel that we would not be able to produce the materials requested in the RFP for this amount but would be open to discussion and revision of the scope in order to stay within ORTC's budget.

Kolano Design has outdoor project experience in and around Pittsburgh and beyond. We have worked with the Friends of the Riverfront to produce 100 miles of water trail markers, Sustainable Pittsburgh to launch RideRackRoll, a bikes on buses program in coordination with the Port Authority of Allegheny County. Kolano Design has completed map designs for the Pittsburgh Parks Conservancy's four City Parks: Highland, Schenley, Frick and Riverview. We have also completed mapping projects Boyce Mayview Park, ELDI, Riverlife, and the Southern Laurel Highlands, Sewickley Heights and Fox Chapel Boroughs. In addition, we have completed maps for the Port Authority of NY & NJ as a part of their larger wayfinding program.

We have attempted to provide a full and complete response to your requirements. If there is any area that we have misinterpreted or that may require additional information, do not hesitate to ask for clarification.

Sincerely,

William J. Kolano

OBJECTIVES

People use maps when they do not know where they are going. Maps must not only guide, but they must provide security, orient the user to landmarks and enrich the travel experience.

Maps need to communicate quickly, be readable in various lighting levels and function within a wide range of age groups.

The map should meet the following criteria. It must be:

Original, elegant and professional

User friendly and engaging

Clear, logical and efficient with correct legend, scale, north arrows, graticules, projection, index map, etc.

Detailed and accurate with effective use of symbology

Easy to read, using varying sizes of text to imply a hierarchy to the information

Uncluttered, utilizing space to organize blocks of text

Accurate, with correct labels or explanation of features, and classifications

Color sensitive, making use of color to support the branding message of the map

Printed using quality paper and inks, using current technology

Cost effective

SCOPE OF WORK

2.1 **Compile and Review Existing Information and Base Maps (Completed by GAI)**

GAI will gather publicly available Geographic Information System (GIS) base maps to assist in the development of a Map/Guide for the proposed Ohio River Water Trail (ORWT). The base maps will include: topography, bridges, state and local roads, railroads, hydrology (including streams, rivers, and lakes), state and federal lands (including parks, forests, and game lands), local parks, locks and dams, river miles, land trails, public access points, and state, county, and municipal boundaries. GAI understands that these base map layers may be obtained freely from the PA Fish & Boat Commission (PFBC), Pennsylvania Spatial Data Access (PASDA) and other regional plans. Should additional layers be required for developing the Map/Guide, GAI will work with ORTC to determine any additional costs, if needed. GAI will provide GIS files of base map layers to ORTC in an acceptable GIS format (i.e. shapefiles, geodatabase, etc.) to be agreed upon at project commencement.

GAI will accompany ORTC during a corridor assessment of the ORWT and assist in the identification and verification of existing and potential access points, hazards, and opportunities along the river. GAI will provide Trimble GPS equipment as needed in order to acquire additional information, such as the locations of fishing/biking/hiking sites, wildlife observation, shelters, and canoe/kayak/bike racks. GAI understands that a boat and captain/guide will be provided by ORTC for the duration of the corridor assessment.

GAI will review relevant planning documents for the region, including county greenway and trail plans. The proposed locations will be incorporated into the base maps and Map/Guide, as needed. GAI understands that all relevant planning documents will be provided by ORTC. Relevant GIS layers of planned greenways and trails will be compiled by GAI and provided to ORTC along with the GIS files of base map layers.

Task 2.1: Compile & Review Mapping

Principal	8 hours at \$135 per hour	\$1,080.00
Project Manager	7 hours at \$90 per hour	\$630.00
Production Designer	6 hours at \$65 per hour	\$390.00
GIS Specialist	38 hours at \$50 per hour	\$1,900.00

Total		\$4,000.00
--------------	--	------------

Task 2.1: River Reconnaissance

Principal	0 hours at \$135 per hour	\$0.00
Project Manager	10 hours at \$90 per hour	\$900.00
Production Designer	10 hours at \$65 per hour	\$650.00
GIS Specialist	79 hours at \$50 per hour	\$3,950.00

Out of Pocket Expenses	(Boat Rental)	\$1,000
-------------------------------	---------------	---------

Total		\$6,500.00
--------------	--	------------

SCOPE OF WORK

2.2 Prepare Base Maps for Map and Guide (Completed by GAI)

GAI will further refine the base map data developed during Task 2.1 to include information gathered during the corridor assessment, safety and hazard information, boating regulations, natural, cultural, and historic points of interest, and launch sites. GAI will work with ORTC to identify suggested amenities along and near the ORWT and incorporate such information into the base maps. GAI will also work with ORTC and Kolano Design to determine the color palette and graphic elements to be used in the preparation of the base maps. The color palette will help to maintain consistency throughout development of the ORWT Map & Guide.

GAI, with guidance from the ORTC, will identify the locations of inset maps and additional (non GIS) information. GAI will prepare inset maps as needed to show more detail of the tributaries, and to include directions to various points of interest. GAI understands that ORTC will provide coordinates of most all points of interest and descriptive text for each. GAI will also prepare two index maps to be used with the base maps; the first will show the location of the ORWT in relationship to state and county boundaries (Pennsylvania, West Virginia, and Ohio); and the second will show the location of the various inset maps as needed.

GAI will use Esri ArcGIS Desktop software to develop, compile, and prepare GIS base maps, and will provide all digital files (MXD's, etc.) to ORTC for future updates.

Principal	4 hours at \$135 per hour	\$540.00
Project Manager	12 hours at \$90 per hour	\$1,080.00
Production Designer	12 hours at \$65 per hour	\$780.00
GIS Specialist	52 hours at \$50 per hour	\$2,600.00
Total		\$5,000.00

2.3 Preparation of Water Trail Map and Guide (Completed by Kolano)

Kolano Design will work closely with ORTC to deliver a high-quality, unique map for the 63 mile Ohio River Water Trail specified in the RFP. A 21.75 x 16.5, full color map/guide will be created for print and online use. The map will include a custom map created from GAI's GIS base map. Additional information may also include information about the regions history, ecology, geology, heritage, wildlife and economic stimulus. Kolano will follow the guidelines and existing graphic standards set forth by the PA Fish and Boat Commission. The print files will be managed and delivered to ORTC in shrink wrapped quantities of 50 and packed in cartons.

Kolano will also update the PA Water Trails logo and incorporate new elements.

Principal	6 hours at \$120.00 per hour	\$720.00
Project Manager	18 hours at \$95.00 per hour	\$1,710.00
Production Designer	36 hours at \$65.00 per hour	\$2,990.00
Total		\$5,420.00

SCOPE OF WORK

2.4 Publication of Trail Map and Guide (Completed by Kolano)

Once the completed map is approved Kolano will reformat the full size map into printable 11x8.5 paginated PDFs. We will provide in Low and High resolution formats.

Production Designer 8 hours at \$65 per hour \$520.00

Total \$520.00

TOTAL DESIGN FEE **\$21,440.00**

ORTC Guide/Map Printing Estimates (Completed by Champ Printing)

Four color process and overall aqueous gloss coating, two sides

100 lb. gloss text, white, Color match, mechanical and PDF proofs provided by Champ Printing

21.75 x 16.5, score, trim and fold to finished size 3.625 x 8.25, bleeds

shrink wrapped in 50's

10,000---\$2,050.00

20,000---\$3,150.00

PROJECT SCHEDULE

Project Schedule	KD submits the following preliminary time schedule for the project outlined in this proposal. This schedule based on the dates provided in the RFP.
Proposals Due	October 11, 2012
Consultation Interview/ Selection of design firm	November 1, 2012
Week 1	Kick-off Meeting Review and compile existing GIS maps
Week 2	Assessment of Corridor by boat. Identify potential new access points along the river Compile information and start to layout large base map Add additional segment insets and incorporate additional points of interest and labeling
Week 6	Review progress with ORTC Create 2 Index Maps (Ohio River Water Trail and location of the inset maps) Client Feedback Incorporated onto the map
Week 9	Start logo concepts
Week 12	Present logo concepts and finalized map to the ORTC Start layout of the guide
Week 15	Edit logo concepts to create a final identity Present layout of guide to ORTC
Week 17	Incorporate ORTC revisions into guide and resubmit for review
Week 18	Provide all digital files in preferred format to the ORTC Prep files and send document to print Manage proof and delivery of final guide
Week 20	Wrap-up Meeting

BACKGROUND & EXPERIENCE

Kolano Design

Holly K. Cholak
holly@kolano.com

In the mid 1950's Irene Pasinski returned after completing a Fulbright Fellowship in Europe and founded Irene Pasinski Associates, an industrial and graphic design firm with an international roster of clients. In the mid 1970's William Kolano joined the firm upon graduation from the architecture department at Carnegie Mellon University and added signage and interiors to the company's list of services. In the early 1990's the company changed it's name to Kolano Design with the retirement of Ms. Pasinski and expanded into multi-media.

Kolano Design (KD) is a visual marketing firm with 5 areas of expertise: corporate communications/graphic design, signage, products, interiors and packaging. The staff is comprised of backgrounds in marketing, graphics, architecture, industrial design and interiors. Clients cover the spectrum from large multi-national corporations, government agencies, and not-for-profit institutions to small businesses.

Kolano Design has dedicated itself to working with the most current technologies. The offices, equipment and computer software are continually updated.

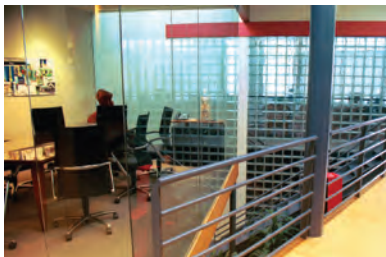

Employees are knowledgeable in all areas of graphic design from project concept to completion.

Staff is proficient on both PC and Mac platforms (*office is equip with Mac*). Software such as Adobe Creative Suite (*CS5 and previous versions*), Microsoft Office Products, Flash and Dreamweaver are all used on a daily basis to create print and web based materials.

On top of our software basics Kolano has advanced technology, making travel for project review unnecessary. We are equipped with the latest software allowing for live internet working sessions from any location around the world.

Kolano will conduct additional progress meetings with the use of conference calls and a web-based conferencing system known as 'Glance' This allows presentation and review of the drawings and other graphic materials via the internet in real time. Often, changes to the graphics and drawings can be made during the conference instantaneously for review by the Client.

Kolano will be responsible to manage and maintain all phases and tasks according the Client's expectation of high quality service. To ensure efficiency Kolano will issue reports once every 2 weeks indicating the status of work accomplished, work in progress, deliverables pending, schedules, budgets and interdependencies to all project personnel.

PERSONNEL

Name **William J. Kolano**

Project Title *Principal-in-Charge & Owner, Kolano Design*

Education Carnegie Mellon, Architecture 1975; Entrepreneurial Management, 1999

Profile

Kolano Design is among the foremost graphic design firms in the United States. Mr. Kolano has assembled a team with backgrounds in architecture, industrial design, interiors, marketing and graphics who have collaborated on innovative contributions to the field of signage. Today's effective sign systems not only lead people to a desired destination, they have the ability to entertain, delight and enhance business relationships.

Graphics, signage and branding programs integrating residential living with retail amenities have been developed and implemented for Southside Works, Market House Condominiums and 1660 Murray Avenue. Kolano Design was awarded the contract to market the riverfront development site in Pittsburgh's Cultural District.

Special sign codes have been written by KD for Pittsburgh's premiere entertainment destinations including Station Square and the Carson Street Historic District.

Kolano Design has made a specialty of sign design in outdoor environments. Masterplans have been created for Pittsburgh's 4 city parks and 100 miles of water trails in Western PA. A unique system implemented at Fallingwater is designed of sliced boulders and petrified wood.

Large corporations have turned to Kolano Design to incorporate signs into their overall corporate branding initiatives. Clients include Mellon Financial, Citizens Bank, Duquesne Light, Ariba, and Heinz. A sign program was recently implemented for Del Monte facilities worldwide.

Kolano has been instrumental in promoting Pittsburgh's outdoor amenities, facilitating strategic initiative planning for Sustainable Pittsburgh. A project to package and promote the amenities along the National Road Heritage Corridor was installed along with design of an internet based competition site sponsored by the Riverlife Task Force for the West End Bridge.

Kolano Design is one of the country's foremost experts in signs for travelers. Pittsburgh International Airport, designed over a decade ago, is still ranked first in signage by Travel Trak. JD Powers recorded a 35% increase in customer satisfaction at Newark Liberty International Airport as a result of the new Kolano sign system. Masterplans have been created for Phoenix Sky Harbor, San Jose International and Erie International airports along with a trail blazing system for the AirTrain linking Penn Station, Newark and Kennedy Airports.

Accolades include three works in the collection of the Museum of Modern Art, accession to the permanent collection of ephemera, Drawings and Prints Department, Cooper-Hewitt National Design Museum, Smithsonian Institution; inclusion in the permanent collection of the Corning Museum.

Bill Kolano was a founding member of the City of Pittsburgh Civic Design Advisory Panel and currently serves on the Market Based Renewal Opportunity Task Force. As Chairman of the Pittsburgh Botanic Garden, he guided masterplan creation for the 432 acre Botanic Garden, increased membership five-fold and secured lead-gift funding. He is also a Chairman of Pittsburgh Magazine's Restaurant Review Panel.

Participation

Bill will act as the team leader and provide the overall creative strategy for the project.

PERSONNEL

Name **Holly K. Cholak**

Title *Senior Project Manager & Graphic Designer*

Education International Academy of Design & Technology,
Associates Degree in Specialized Technology, 2004
The Art Institute of Pittsburgh, Bachelor of Science Degree, 2006

Experience 6 Years

Profile

Holly graduated at the top of her class from the Art Institute of Pittsburgh. At Kolano Design, she rapidly escalated from production to key creative designer to head of the graphics team. Holly is involved in the complete life cycle of a project from concept to completion and is noted for her clean, elegant design and meticulous attention to detail.

Holly has achieved unprecedented success in projects such as the Pittsburgh Marathon, where her marketing campaign drew 11,000 runners, when 4,000 were anticipated. Her branding of the Pennsylvania Ballet has dramatically altered the perception of this extraordinary dance company, increasing attendance in spite of a down economy. Holly is currently working with the Heinz History Center to create a dimensional map and exhibit guide for visitors to the museum and a commemorative book for Riverlife's 10th Anniversary Celebration.

Holly has created within an array of media and has utilized marketing tools such as QR Codes, Phone Apps, Twitter, YouTube and Facebook.

Recent projects include:

- Botanic Garden of Western PA; Website redesign
- Federation of Appalachian Housing Enterprises Annual Report
- Riverlife; Identity Redesign, Capital Projects marketing brochures
- Point State Park Grand Opening interpretive panels and maps
- Pennsylvania Ballet; Total Rebranding of all marketing and development materials
- Pressley Ridge; Event invitation and print materials
- Pittsburgh Cultural Trust; 2007-2012 Annual Benefit printed materials, 25th Anniversary Celebration exhibition and print materials
- Pharmachem; National advertising campaigns for neurtaceutical products
- Foxwall EMS; Volunteer recruitment and capital campaign
- Grant Architects; Identity and web design
- La Roche College; Annual Speaker Series printed materials
- L.E. Smith Glass; Web site, print catalogues and advertising
- Friendship Circle; Web design and ongoing communications
- Fox Chapel Borough; Trillium Trail map and signs
- Sewickley Heights Borough; Park map
- Sustainable Pittsburgh; Marketing materials
- Upper St. Clair Township; Custom park map and information piece
- Winepicks; Identity and web app Icons

Participation Holly will be responsible for the day-to-day management, as well as the point of contact for the project.

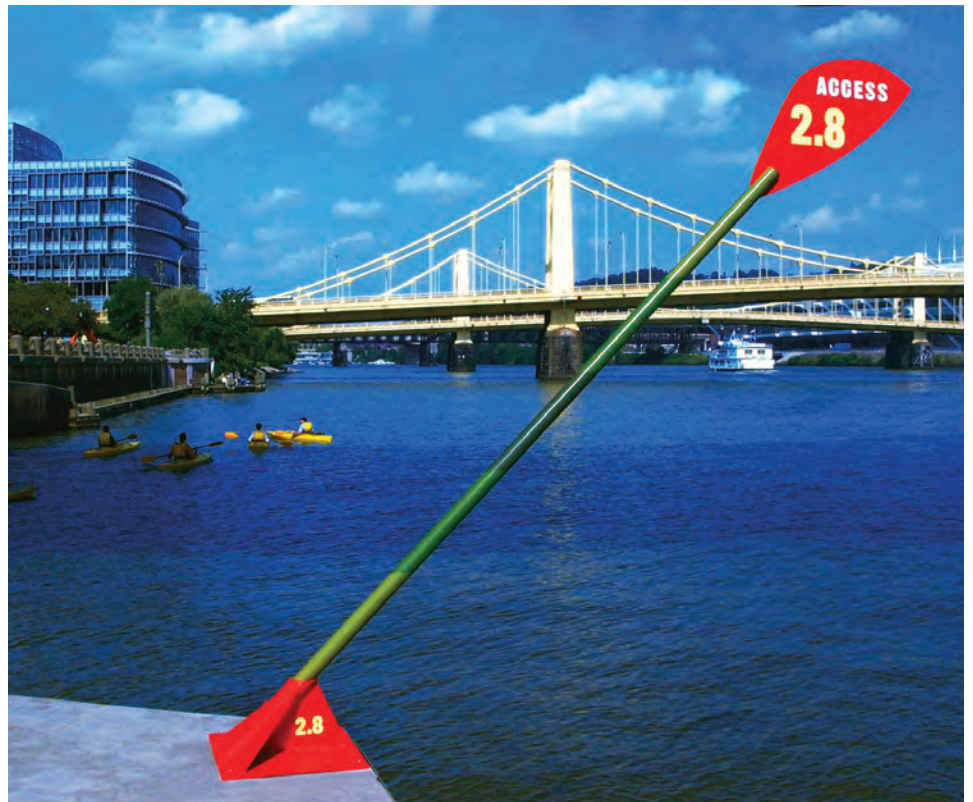

PRIOR EXPERIENCE

Friends of the Riverfront

Mr. Tom Baxter

Friends of the Riverfront
33 Terminal Way
Pittsburgh, PA 15219
412-488-0212

Kolano has worked with Friends of the Riverfront to create 100 miles of custom designed water trail markers along the Allegheny and Monongehala Rivers. Each Three Rivers Water Trail sign orients paddlers from both land and water.

PRIOR EXPERIENCE

Pittsburgh Parks Trail Map & Brochures Schenley, Riverview, Highland and Frick Parks

Ms. Meg Cheever
Pittsburgh Parks Conservancy
2000 Technology Drive, Suite 300
Pittsburgh, PA 15219
412-682-7275

The Pittsburgh regional park maps provide detailed information that allows users to create their own unique park experience. Access points, trail routes, connections, difficulty levels, distances, destinations, amenities and programs are outlined. Maps of the four regional parks were completed for the Pittsburgh Parks Conservancy this year.

The park is used by patrons of all ages and physical abilities, from children and fitness walkers to extreme sports enthusiasts. The regional park maps are designed for people who have used the parks their entire lives and those who are visiting for the first time and need orientation to the large parks. Based on user request, the maps include trail distances and popular park destinations. To best provide information about park amenities, the maps include four-color photos and descriptions that begin to brand each as a unique destination.

The objective of the maps is to provide information that could assist current park users, educate visitors and entice new users to the parks. Information about park amenities was incorporated to provide a total picture of the park experience. For example, runners who pick up the Schenley Park map to determine trail routes, find information about the Schenley Park Visitor Center, a destination designed for their refreshment. Other areas of interest like the Tennis Program, are also cross-marketed to these potential users. The Pittsburgh Parks Conservancy wants these publications to be a tangible example of the parks rejuvenation, a documented guide to the work of the Pittsburgh Parks Conservancy since its beginning.

The Regional Park Maps can be considered one of the first components of Pittsburgh's Branding Initiative. 'Outdoor Amenities' is one of the prime drivers attracting talent to a region. Outdoor Amenities is one of the five attributes of our region selected for marketing.

Park users have been very enthusiastic about the new maps. Volunteer offers have increased and new users have ventured into the parks, particularly those viewing maps at the Schenley Park Visitor Center. More areas of each park are being accessed and membership continues to increase in the Pittsburgh Parks Conservancy. The park maps served as the catalyst and graphic prototype for Sustainable Pittsburgh's Ride Rack Roll, Bikes on Buses maps. That map shows people how to access regional trails and the 4 City Parks via public transportation, and encourages bike usage. It started as an independent venture, but became a linked companion piece.

Additional maps branding other parks and trails around the Pittsburgh region are currently being planned by other groups to coordinate with the visual look of the Schenley and Frick Park maps. Kolano designed the map for Sewickley Heights Park to correspond. What started as a small initiative to help park users, is becoming the template for all of the region's outdoor amenities.

PRIOR EXPERIENCE

Bikes on Buses Route Map Ride Rack Roll

Mr. Court Gould

Sustainable Pittsburgh
425 Sixth Avenue, Suite 1335
Pittsburgh, PA 15219
412-258-6646

A map created for the Port Authority showing the bus routes that have bike racks installed on buses and the relation of these bus routes to bike trails and parks. The Maps of the Parks and Trails —Rick Rack Roll is an important marketing tool for the region. In this map the area trails are presented with detailed descriptions of area parks and trails. Kolano Design was instrumental in “branding” these trails so that potential users could get an accurate account of the type of experience that could be expected.

The map was developed to encourage students and residents of Pittsburgh to take advantage of the various trails in the region and using public transportation to access these trails and thus avoiding the often crowded city streets. It was also produced as a marketing tool for the region and provided to people that may be transferred here as part of employment, considering attending school, or just visiting the area.

What started as an independent venture, became a linked companion piece to the Pittsburgh regional parks maps. The design is clean, concise, straight forward and visually engaging for all age groups.

Additional maps branding each of the trails around the Pittsburgh region are currently being planned by other groups to coordinate with the visual look of the these maps. What started as a small initiative to help park users, is becoming the template for all of the region’s outdoor amenities.

PRIOR EXPERIENCE

Kolano design has designed hundreds of logos for companies, local and national, large and small. Here is a sampling.

PRIOR EXPERIENCE

Laurel Highlands Trail Map and Brochure

Donna Holdorf

65 West Main Street, 2nd Floor
Uniontown, PA 15401
724-516-8806

The Laurel Highlands Trail Map and Brochure highlights the 10 major amenities in the area along with other attractions of the area. The challenge was the coordination and selection of all the images and copy needed to produce this informational piece while maintaining its longevity.

A special feature that Kolano Design developed was the development of trip itineraries for the Laurel Highlands Trail Map and Brochure. These itineraries are used by visitors to tailor a trip to their own personal tastes and abilities. The itineraries included a length of time needed to enjoy each attraction. Descriptions and time tables of other area attractions are also included in the brochure. Presenting the information this way made it easier for visitors to take full advantage of the area amenities within the time allotted.

Kolano Design also developed the “Elevate the Senses” theme concept for the map. This concept encompasses the 5 senses that are elevated by visiting the Southern Laurel Highlands.

See the world famous architecture...
Hear the music, laughter and grandeur of a live performance...
Taste a variety of culinary delights...
Feel the rush of the rapids...
Smell the pure mountain air...

PRIOR EXPERIENCE

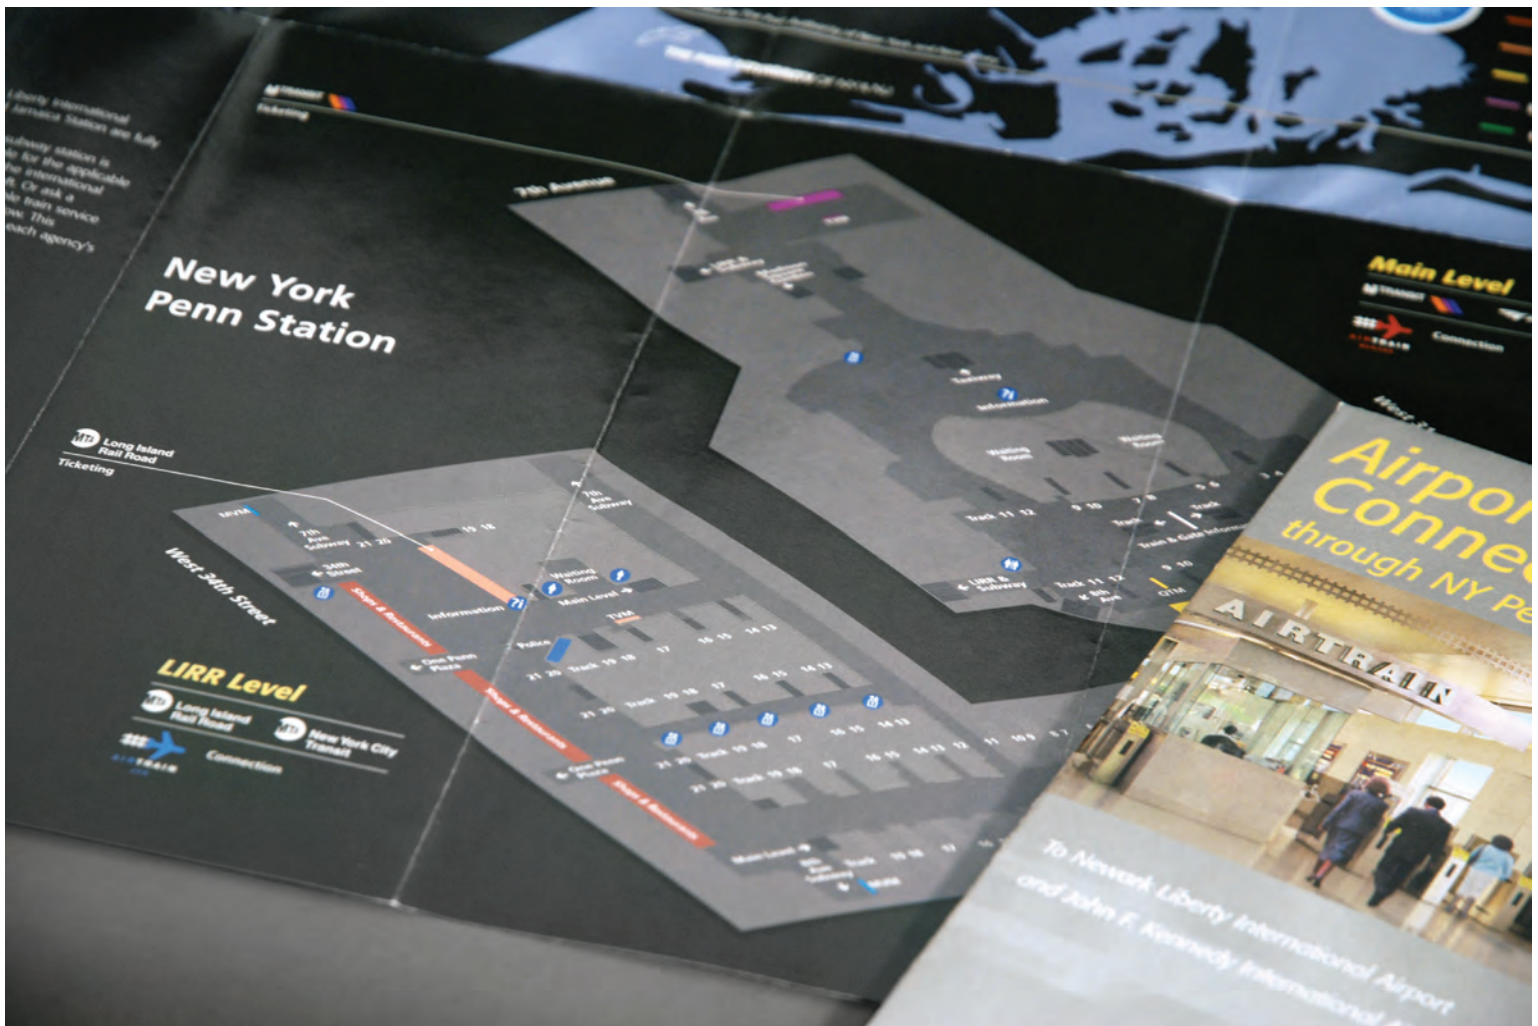

Port Authority of New York and New Jersey

Mr. Robert Parsekian

Port Authority of NY & NJ
Two Gateway Center, 14th Floor E12
Newark, NJ 07102
973-565-7698

Kolano Design has performed call-in consultant services and numerous projects for the Port Authority of NY & NJ since 1994.

Kolano Design was given the task of educating and informing the public about the new AirTrain Rail System in the New York and Newark metro areas. The AirTrain was a new service developed by the Port Authority of NY & NJ (PANYNJ) in cooperation with Amtrak and NJ Transit. The new service would allow patrons to reach Newark International Airport (EWR) by using a newly constructed station connecting AmTrak and NJ Transit trains with the existing on-site EWR rail system.

PRIOR EXPERIENCE

Pittsburgh Three Rivers Park Map

Mrs. Lisa Schroeder

Riverlife

425 Sixth Avenue, Suite 1340

Pittsburgh, PA 15219

412-258-6639

Riverlife is an organization coordinating a 3 billion dollar improvement of the shorelines at the confluence of the Allegheny, Monongahela and Ohio rivers in Pittsburgh, Pennsylvania. The shoreline, called Three Rivers Park, encompasses projects that have been completed, are currently in construction and those that are still in the conceptual stage.

This park has been called the “green necklace”. It will be similar to New York’s Central Park, an outdoor living room for the residents of the city.

The Three Rivers Park Map is an easy to read document to explain the status of these projects in 2008. The map is part of a suite of materials created for education, fund raising and public awareness. The map has been praised for its ability to quickly explain the components of this very complicated development. Additional companion pieces have been created for each segment of the project.

PRIOR EXPERIENCE

Carnegie Mellon University Campus Map

Ms. Lara Sakasai Steiner
Carnegie Mellon University
6 PPG Place, 14th Floor
Pittsburgh, PA 15222
412.268.3359

As Carnegie Mellon University continues to grow and enroll more students, the challenge was to design and print an easy to understand, cost effective map for new students.

The map, in its small format, can simply be placed in a pocket and unlike other maps with multiple angle folds, the CMU map was designed as a barrel fold which the user can easily access.

An inset graphic shows the campus in relation to the downtown area and other CMU satellite facilities. The extensive legend has numbers and symbols which are keyed into the map, making it easy to find locations within the campus.

The map illustration was purposefully created without any extraneous elements so that it can be quickly understandable. This also makes it effective for downloading from the CMU website and printed on a variety of personal printers. The map was also designed in a limited color palette for printing on black and white printers.

The map was well received by the student body and has become a standard handout to all visitors to the Campus including parents, potential students and visiting professors.

GAI Consultants, Inc.

Corporate Profile

***We transform ideas into reality[®]** with conscientious engineering and environmental professionals who extend sincere advice, excellent design, and shared pride in accomplishment. The distinctive advantage at GAI Consultants is understanding our clients' needs, from concept to completion.*

Our Company

GAI Consultants, Inc. is an engineering and environmental consulting firm with more than 50 years of experience delivering commitment and solutions that make a difference. Our commitment to proactive employment of the most proficient and motivated talent helps our clients tackle the ever-changing challenges of our industry, technology, and regulatory practices. In the process, GAI has become an engineering and environmental hub of more than 800 in-house engineers, scientists, and other professionals who are always accessible to our clients. We study, analyze, design, build, inspect, and manage for our clients, pooling our skills and resources to deliver superior client service throughout the United States and abroad.

Our Clients

Our clients are highly respected global companies, local communities, and government agencies. Challenging us with high-profile projects that demand the most skilled technical expertise available, more than 80% of our clients have built a long-lasting working relationship with GAI because they trust we will meet and deliver on our promises.

Our Communities

GAI's Midwest, Northeast, and Southeast operations mobilize staff and services seamlessly. Our offices foster a unique blend of professional consulting disciplines, dedicated engineering and environmental specialists, and local experts. GAI is committed to helping the communities we live in develop and grow. As we strongly encourage all employees to become active in volunteer activities, we understand that through our dedication, we can help our communities realize a brighter future.

Our Guiding Principles

- Integrating integrity, trust, and quality into all that we do
- Delivering outstanding client service and communication
- Enhancing business through high ethical standards
- Acknowledging our employees' achievements
- Strengthening our success through safety

Our Markets

- Energy
- Transportation
- Real Estate
- Water
- Municipal
- Government
- Institutional
- Industrial

Our Services

- Environmental Engineering and Studies
- Cultural Resources Management
- Electric Transmission Engineering
- Power Plant Engineering

gai consultants

Geographic Information Systems (GIS) Service Profile

Overview

GAI Consultants uses GIS computer systems to capture, store, edit, analyze, and display referenced information. Our GIS specialists geographically organize large quantities of data so it can be examined efficiently in a structured format and formulated into interactive data management programs. We use the data to create information maps and graphic displays for project stakeholders, regulatory agencies, and public meetings.

Our comprehensive GIS services include planning and analysis, database management, and modeling. We use the data for environmental impact statements, air quality and risk assessments, archaeological investigations, groundwater investigations, transportation studies, and land-use planning.

System Planning – GAI evaluates project elements in the early planning stages for transportation and land-use planning, site selection, and site remediation projects.

Database Development – Our GIS specialists design the system, set data protocol, and establish quality control procedures for high-volume project data storage.

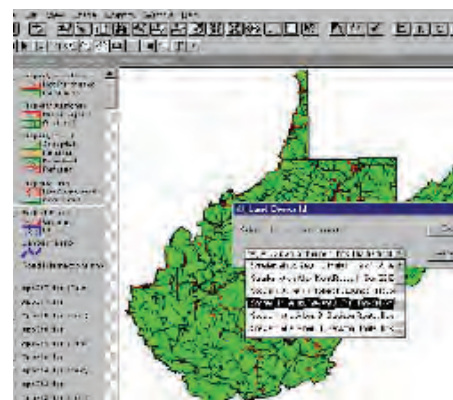

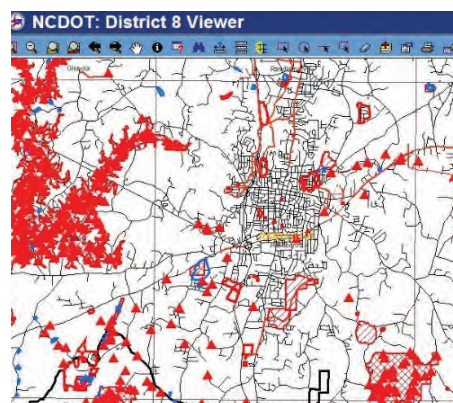

System Analysis – GAI analyzes data using data management protocol and spatial and tabular data development techniques for data management projects.

Modeling – We build models to compare high-probability project sites.

Virtual Simulation – The premier GIS services at GAI include graphic displays of 3-dimensional site, environmental and socioeconomic impact analyses.

GAI's success with GIS rests in our ability to focus on key areas: project development, data requirements, geographical analysis, and data presentation. We listen to our clients to determine their analysis goals and objectives prior to entering data to produce high-quality results. Our GIS professionals gather data on topology, geology, hydrogeology, wetlands, land use, streams, roads, areas of archaeological importance, zoning, and political boundaries using CAD-imported GPS data, or digitized mapping.

GAI reviews every database for quality and completeness before starting our analyses by examining inclusionary and exclusionary criteria until all areas meet the project requirements. A critical part of database development is addressing questions that arise concerning client preference and regulatory constraints. Our flexibility in modifying criteria to achieve accurate results that satisfy project goals enables our GIS specialists to deliver a product that answers questions for clients, owners and regulatory agencies.

Professional Summary

Mr. Brant specializes in urban design and landscape architecture. He has over 21 years of experience in the planning and design of neighborhoods, urban development, parks and waterfronts, and streetscapes. Mr. Brant has expertise in all phases of site development from conceptual design to construction documentation; including site assessment, master planning, site and landscape design, cost estimating, design documentation, field observation, and regulatory approvals.

Professional Experience

- + Project Manager or Lead Designer for master planning, urban design, and site and landscape design activities, providing technical oversight for a variety of projects.

Neighborhoods

- + Summerset at Frick Park – Pittsburgh, Pennsylvania*
- + Traditional Neighborhood Development – Gadsden, Alabama*
- + The Village of Park DuValle – Louisville, Kentucky*
- + Crawford Square – Pittsburgh, Pennsylvania*
- + Washington's Landing – Pittsburgh, Pennsylvania*

Urban Development

- + United States Custom House – Philadelphia, Pennsylvania
- + Biltmore Park Town Square – Asheville, North Carolina
- + Cranberry Promenade – Cranberry Township
- + Black Mountain Mixed-Use Center – Black Mountain, North Carolina
- + Aksarben Village – Omaha, Nebraska

Parks and Waterfronts

- + Three Rivers Heritage Trail System – Pittsburgh, Pennsylvania
- + North Park Lake Trail – Allegheny County, Pennsylvania
- + South Park Fairgrounds – Allegheny County, Pennsylvania
- + Pack Square Park – Asheville, North Carolina
- + North Shore Memorials – Pittsburgh, Pennsylvania

Streetscapes

- + Shiloh Street – Pittsburgh, Pennsylvania
- + Oakland-CMU Pedestrian Study – Pittsburgh, Pennsylvania

Professional Employment History

Dominion, 2006

Professional Summary

Mr. Owens specializes in designing and maintaining Geographic Information Systems (GIS) using Esri ArcGIS for Desktop and Server, including ArcView, ArcInfo, ArcSDE, 3D Analyst, and Spatial Analyst tools. He uses programming techniques and technological experience to assist in data collection, developing and mapping spatial data, data analysis, and report generation, as well as in the development of web-based GIS services, applications, and databases.

Mr. Owens is an experienced field data collector and manager using Trimble GPS hardware and Pathfinder Office software, responsible for developing project data standards, compiling data and maps, performing environmental impact analyses, and quality assurance.

Mr. Owens leads in the development, implementation, and quality control of data and work-flow management systems for: legacy (historical) data migrations, project management, assets/facilities management, and agency compliance monitoring.

As GAI's Practice Area Leader for GIS in the Northeast region, Mr. Owens is responsible for: implementing data, mapping, and quality standards for GIS; coordinating and working together with I.T. and HelpDesk groups to streamline software/hardware deployments; conducting recurring technical meetings with other relevant Practice Area staff; marketing GIS to internal and external clients; and attending local and regional seminars and conferences in order to remain engaged with the GIS community.

Professional Experience

- + Task Manager and Senior Lead GIS Specialist for a variety of natural gas pipeline, electric transmission, and transportation projects.
- + Database Specialist for data, permitting, and work-flow management systems.

GIS Projects

- + GIS Database & Mapping for Roadway Permits – Laurel Mountain Midstream
- + GIS Database & Mapping for Environmental Permits – Williams Field Services
- + Constraints Mapping & Environmental Impact Assessment – AEP

Database Projects

- + Project Work-flow System for Marcellus Shale Well Drilling – Chevron
- + Storage Tank Database & GIS Web-Map – Penna. Turnpike Commission
- + Environmental Permit Management System – Dominion

Ligonier Valley Trail and Bikeway Feasibility Study

Westmoreland County, Pennsylvania

Brief Project Description

GAI Consultants conducted a feasibility study for Phase Two of the Ligonier Valley Trail and Bikeway. The study, which involved preliminary research, GIS mapping, trail route alignment alternatives, cost estimating and phasing, guides future design improvements and grant funding initiatives. GAI also conducted a complete field visit and assessed the existing street network to determine the best possible "Share the Road" routes.

The existing Phase One trail network was dramatically expanded in all directions to connect residents and visitors to regional recreational, commercial, historical, and cultural amenities. This project builds on the Phase One trail efforts currently being realized through the support of many trail stakeholders.

Work Tasks/Services

- GIS mapping
- Corridor assessment
- Shared route analysis
- Americans with Disabilities Act compliance assessment
- Trail alignment and facilities planning
- Cost estimating
- Construction scheduling and permitting

Lasting Benefits

Expanding the existing trail infrastructure benefits the local community by connecting people to historic and culturally significant sites. Additionally, the project provides health, recreation, and educational opportunities as well as more opportunity for economic development.

SUBCONTRACTOR FOR PRINTING

Champ Printing

730 Fourth Avenue
Coraopolis, PA 15108
412-269-0473

Strategically positioned at the confluence of Technology and craftsmanship we are dedicated and motivated to exceed the expectations of our clients. Providing a wide variety of printed communication services that will incline you to trust us for more than just a print order, but to be your printer. We value the work that our clients have us do for them, but we value the relationship with them even greater.

We run on top-quality presses, operated and attended by an outstanding team of pressmen, dedicated to the production of the most accurate printed images. We're at your service 24 hours a day, 7 days a week to ensure that we meet deadlines with time to spare.

Forward looking companies like Champ Printing are committed to reducing to a minimum the environmental impact of our business activities. We recognize our responsibility as Earth's citizens to sustain the forests of the world, to protect the air we all breathe and to conserve and recycle the minerals and metals extracted from the earth. We invite our business partners and clients' to join us as we continue in these ongoing efforts.

Our FSC Certification

The Forest Stewardship Council was established in 1993. Its goal is to promote responsible management of the planet's forests. This non-profit organization has developed standards, a voluntary certification system and a trademark that identifies its users as being environmentally aware and active. Its standards for forest management have been applied in over 60 countries and 170 million hectare.

Champ Printing is very pleased to have been certified to use this trademark, which indicates that the printed production which it appears flowed from a forest to a paper manufacturer to an FSC printer.

Your acceptance of this agreement and the signing of same shall constitute an agreement between us. I have included two copies of the proposal. Please sign both and keep one for your records. Send the second copy back to Kolano Design for our files.

Sincerely,

William J. Kolano
Kolano Design Inc.
