Attn: Dr. Vincent Troia, CEO

RE: Ohio River Water Trail
Water Trail Map & Guide Preparation
Mackin PIN 12-253

Dear Dr. Troia:

We recognize the importance of promoting the Ohio River and its tributaries as destinations for canoe, kayak, and rowing enthusiasts, boaters, and anglers within and outside of our region. Many of the projects that Mackin Engineering Company (Mackin) has successfully completed have focused on waterways, trails, greenways, and recreation.

With over 50 years of experience in the consulting industry, Mackin has the expertise and experience to assist the Ohio River Trail Council (ORTC) in the completion of the Ohio River Water Trail Map and Guide. The enclosed qualifications package and proposal outlines our approach to completing this project in a manner that will exceed your expectations.

In order to provide the best possible service to the ORTC, we have assembled a highly qualified team specifically tailored to address the tasks anticipated for this project. Leading these efforts will be Ms. Brandi Rosselli, AICP, Mackin's Manager of Planning Services, who will be responsible for overseeing the project and managing our team of community planners, landscape architects, and graphic design professionals.

We hope that the enclosed information conveys our commitment to completing a water trail map and guide for the Ohio River – from Point State Park (City of Pittsburgh) to Newell, WV that can be used to increase ecotourism and improve the utilization and stewardship of the region's natural and recreational resources.

If we can provide any additional information or if you have any questions, please feel free to contact me at (412) 788-0472 or dmartinak@mackinengineering.com.

Sincerely,
MACKIN ENGINEERING COMPANY

SECTION 1: PROJECT APPROACH

Ohio River Water Trail Map & Guide Preparation

The following tasks (work elements) for the completion of the Ohio River Water Trail (ORWT) Water Trail Map and Guide Preparation will be completed by Mackin staff in close collaboration with the ORWT Committee and the Ohio River Trail Council (ORTC).

Compile and Review Existing Information and Base Maps

Members of our project team will review and compile existing Geographic Information System (GIS) base maps from sources such as the PA Fish and Boat Commission (PFBC), Pennsylvania Spatial Data Access (PASDA), Southwestern Pennsylvania Corporation (SPC), County and Local Municipal Databases, and other regional plans that have been completed. This information will be reviewed for accuracy and used to prepare the base maps that will be field verified.

We will also review planning documents pertaining to trails and greenways for this region that are provided by the ORTC.

Our team members, along any members of the ORWT Committee or the ORTC who wish to take part in the field view, will field view the entire length of the project study area. Along the way, we will inventory and collect latitude / longitude for access points, hazards, opportunities, etc. using a Trimble GeoXH handheld Global Positioning System (GPS) with submeter accuracy. A GPS-enabled camera will be used to photograph the points of interest collected during the field views. These photos will be linked to the mapped GPS points; and all data will be provided to the client at the end of the project.

The river corridor will be assessed through the previously mentioned identification and verification of existing and potential access points, hazards and opportunities. The GPS points that we acquire will be used to supplement the 529 Power Point Slides that have been compiled by the ORTC.

The field view and assessment of the river corridor will be conducted on board a boat being rented through Marion Hill Associates, Inc. – Diving and Marine Services Group, located in New Brighton, PA. An experienced river pilot from Marion Hill Associates will navigate the boat and assist in the identification of access points and hazards.

Prepare Base Maps for the Water Trail Map / Guide

The Mackin Team will utilize the information acquired from the first task—compile and review existing information and base maps—and refine this mapping to create the base map for the Water Trail Map and Guide. The information will be compiled on one map encompassing the entire study area. Segments may be included as insets, as appropriate, in order to make the final deliverable easy to read and aesthetically pleasing.

The Water Trail Map will be created in a GIS format that is agreeable to the ORTC. The base map layers will include but not be limited to: major and minor roads; rivers and streams; state, county and local municipal boundaries; public lands—forests, game lands, parks, etc.; existing and proposed trails; elevation; public / private access points; river mile points; locks and dams; bridges; railroads; historic / cultural sites; etc.

After review by the committee, the map will be revised to include any additional points of interest, labeling, and text that will specify interpretive, visitor, and safety information.

The Mackin Team will also develop inset maps for tributaries (if needed) that include additional detail, directions to access points, portages, campgrounds, etc. Also included in this task will be the creation of two index maps—one showing the location of the Ohio River Water Trail to Pennsylvania, West Virginia, and Ohio, and another showing the location of the inset maps (if any are created).

SECTION 1: PROJECT APPROACH

Preparation of Water Trail Map / Guide

Once the map(s) has been reviewed and is determined to be a final draft, it will be exported in a mutually agreeable format that will be used for the design and layout of the Water Trail Map and Guide. The text (guide) side of the map will be completed in a visually aesthetic and easy to understand presentation. The design will adhere to the standards established in other water trail maps / guides developed for the PA Fish and Boat Commission.

The Mackin Team, which includes our graphic designer, will assist the ORTC with the creation of a water trail logo for this portion of the Ohio River (and tributaries as part of this project) in a mutually agreeable format that includes the PFBC water trail logo standard.

The water trail map / guide will be developed so that it can be easily segmented for inclusion on websites. The maps / guide will be provided in an 8 1/2" x 11" printable format (Adobe pdf or something similar).

Public Outreach

The Mackin Team will meet with the ORWT Committee three times throughout the process to obtain material as well as review deliverables. We will also coordinate the field views with the ORWT to identify volunteers as well as the most effective routes for the trips.

In addition to meeting with the committee, the Mackin Team will plan and facilitate one public meeting near the end of the process to present the draft guide for public comment. We will work with the ORWT to determine the best location and format for the meeting, but our team is experienced in holding various types of meetings including large group presentations, open house style meetings as well as presentation with small group breakouts.

The Mackin Team will also provide electronic updates as we move through the process for posting on websites and for use in community newsletters, etc. to keep the public up to date with the progress of the project.

Optional Task: Publication of the Water Trail Map / Guide

Mackin has received a cost proposal from SHAR Document Services to print the final Ohio River Water Trail Maps / Guides as per the printing specifications identified in the Request for Proposals.

The price per thousand is \$400.80 if 10,000 copies are ordered (total cost of \$4,008.00) and \$329.20 per thousand if 20,000 copies are ordered (total cost of \$6,584.00).

Deliverables

Mackin will provide the following deliverables to the ORTC as part of this project:

1. All GIS Files created for the base mapping
2. All Graphic Design files created for the map / guide
3. Website Files (pdf) of the map / guide that are segmented into 8 1/2" x 11" pages
4. Logo Design created for the map / guide in electronic format
5. If part of this project—printed maps / guides for the Ohio River Water Trail Map / Guide. This will be completed by a professional printing shop as per the specifications listed in the RFP.

SECTION 2: PROJECT COST

Ohio River Water Trail Map & Guide Preparation

SECTION 2: PROJECT COST

	TASKS	HOURS	RATE	COST
COMPILE & REVIEW EXISTING INFORMATION & BASE MAPS	Review and compile existing GIS information			
	Senior Planner	4	\$67	\$268
	Field Views (3 days by boat, 2 days by kayak/canoe)			
	Senior Planner	40	\$67	\$2,680
	Senior Landscape Architect	40	\$75	\$3,000
	River Guide (and boat expenses)	24	\$80	\$1,920
	Review existing planning documents			
PREPARE BASE MAPS FOR THE MAP/GUIDE	Senior Planner	8	\$67	\$536
	Prepare base maps			
	Senior Planner	16	\$67	\$1,072
	Finalize maps			
	Senior Planner	2	\$67	\$134
	Prepare inset maps			
	Senior Planner	2	\$67	\$134

	Design logo			
	Senior Planner	2	\$67	\$134
	Graphic Designer	8	\$63	\$504
PUBLIC OUTREACH	Prepare map & guide in electronic PDF format			
	Senior Planner	2	\$67	\$134
	Graphic Designer	2	\$63	\$126
	Steering Committee Meetings (3 meetings)			
	Senior Planner	6	\$67	\$402
	Public Meeting (1 meeting)			
	Manager Planning Services	2	\$97	\$194
	Senior Planner	8	\$67	\$536
TOTAL PROJECT COSTS				\$13,208

PRINTING COSTS	Quantity	Price per 1,000	Total Printing Cost
	10,000 Map/Guides	\$400.80	\$4,008.00
	20,000 Map/Guides	\$329.20	\$6,584.00

SECTION 3: CONSULTANT QUALIFICATIONS

Ohio River Water Trail Map & Guide Preparation

SECTION 3: CONSULTANT QUALIFICATIONS

Company Profile

History & Background: Serving our clients since 1960, Mackin Engineering Company (Mackin) remains a leader in the civil engineering field. Although our roots lie in providing engineering services, we have grown to offer a wide range of professional consulting services for both public and private sector clients from across the Commonwealth. Mr. Italo V. Mackin, P.E., P.L.S. (the company's founder and Chairman of the Board) is joined by Dean I. Mackin, *CEO* and Thomas E. Riester, P.E., *President* in overseeing our 60+ multi-disciplinary staff, which includes dedicated professionals in the fields of civil engineering, traffic engineering, landscape architecture, environmental, planning, surveying, structural engineering, construction inspection and more.

Professional Services Offered: Mackin offers a diverse, experienced team of professionals to perform an array of services for the successful completion of transportation, municipal, and land development projects. This team approach is enhanced by the utilization of the most advanced technical equipment including GIS, digital survey, scanning & 3D modeling and CADD document production. Services offered by our firm include:

- » Municipal Planning /GIS Services
- » Graphic Design
- » Landscape Architecture
- » Traffic Engineering
- » Land Surveying
- » Highway / Roadway Engineering
- » Structural Engineering
- » Civil Engineering
- » Construction Inspection / Management

Dennis W. Martinak, AICP – *Director of Municipal Services*
Robert W. Genter, R.L.A., ASLA – *Director of Land Development Services*

SECTION 3: CONSULTANT QUALIFICATIONS

Qualifications

Mackin has extensive experience in the completion of projects similar to the ORTC Water Trail Map and Guide Preparation for the 46-mile segment of the Ohio River and 17-miles of tributary waterways. This experience includes: comprehensive land use plans; comprehensive waterway plans; greenways plans; management action plans for state and federal heritage areas; recreation, park and open space plans; river conservation plans; trail feasibility studies; water resources management plans; water trail planning; and watershed management plans.

Most of the projects completed had mapping and / or graphic components that included identifying many of the elements that are found in the Ohio River Water Trail Map and Guide Preparation Request for Proposals. A complete list of projects, as well as specific examples of similar work, can be found in the Experience Section of this proposal.

Our project team assigned to this effort is very familiar with the project study area as we have completed, or are in the process of completing, projects that are located along the Ohio River.

This group of professionals has routinely worked closely with our clients in order to provide the end products that exceed their goals and expectations. We anticipate a similar working relationship with the core group of the ORTC and its subcommittee representatives.

Advantages of Selecting the Mackin Team

- » Multi-disciplinary project team available to meet client schedules and expedite a seamless and successful project.
- » Expertise of the Project Team – over 50 years of combined experience in completing a variety of similar and relevant projects – many of which have had mapping and graphic components.
- » Extensive experience in waterways, trails, greenways, and community park and recreation projects.
- » Moderate workload – can start work immediately and commit the manpower resources to this assignment in order to provide to our client the highest level of attention and response.
- » Located in close proximity to the project area and familiar with the study area.

SECTION 4: RELEVANT PROJECT EXPERIENCE

Ohio River Water Trail Map & Guide Preparation

SECTION 4: RELEVANT PROJECT EXPERIENCE

Kiskiminetas Valley Greenway, Trails & Downtown Connectivity Study

Currently In-Process

The KV Greenway project is a multi-faceted, greenway, trail and public art planning process for the 26-mile Kiskiminetas Valley (Kiski Valley) in portions of Armstrong, Indiana, and Westmoreland Counties in southwestern Pennsylvania. The overarching goal of the planning process is to build upon natural resources conservation and outdoor recreation opportunities in the Kiski Valley so that those opportunities can be woven into revitalization efforts associated with the Main Street Programs in Vandergrift, and in Freeport, Leechburg and Apollo. In addition to these boroughs, the project involves the following municipalities: North Apollo borough, Kiskiminetas, Parks, Gilpin, and South Buffalo Townships in Armstrong County; Saltsburg borough and Conemaugh Township in Indiana County; and Avonmore, East Vandergrift, Hyde Park, West Leechburg, and Vandergrift boroughs, and Loyalhanna, Bell and Allegheny Townships in Westmoreland County.

An integral component of the project included field views of the 26-mile corridor. These field views included driving the road corridors, walking the greenway and natural areas as well as kayaking the Kiski River in order to “see” the project area from the river perspective, which is much different from the land. Through these various field views, recommendations are being drafted to help connect the communities through automobile, bicycle, pedestrian and water pathways.

It took me too long to get here, but I was enchanted by my first visit to Vandergrift: the design of the town, the bookshop in an old funeral home and my unexpected fall into the Kiskiminetas.

Then I started learning more about this beautiful and fascinating river valley, its bridges and towns, its history, its breakfasts, and I ended up loving this surprising and cool part of Western Pennsylvania.

Producer/Narrator

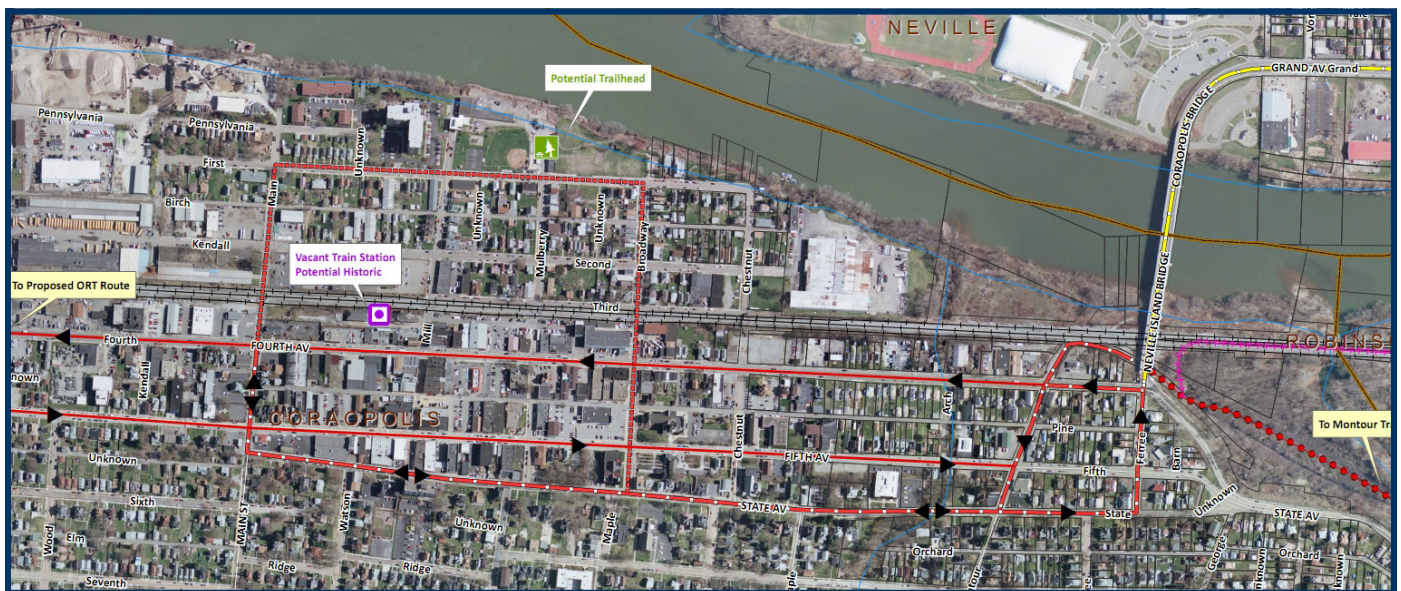

SECTION 4: RELEVANT PROJECT EXPERIENCE

Ohio River Trail: Pittsburgh to Coraopolis Feasibility Study

Currently In-Process

Trails and bikeways are becoming a very important component to communities. They are not only for recreation but many are becoming commuter corridors- safe routes to school, to work and to recreation sites; they are becoming safe links that reconnect the town and connect towns to cities. As more trails are being completed we are realizing that their benefits go far beyond just recreation corridors and safe routes. Communities are seeing growth in the local economy and increased real estate values, as well as improvements in the health of people who use them. The social and environmental facets of communities (and the region) are also being impacted in a positive manner. Overall, these projects are improving the quality of life for the municipalities and to those who use them.

This project's goal is to link the City of Pittsburgh to the Township of Stowe, and beyond. By building these connections, positive economic, social and recreational opportunities for all the municipalities in the 10+ mile alignment will be created. Communities that comprise the project study corridor include: Stowe, Coraopolis, Robinson, Neville, Kennedy, McKees Rocks, and the City of Pittsburgh. The proposed trail will become part of the larger regional and national network by providing a connection to the existing Montour Trail (a 46 mile trail connecting with the Great Allegheny Passage Trail system- to Washington D.C.) and extending to the Ohio Trail network system.

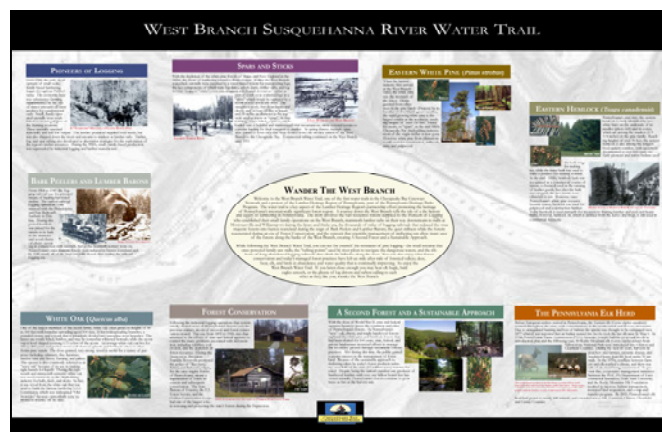

SECTION 4: RELEVANT PROJECT EXPERIENCE

Relevant Project Experience

The following is a list of projects (and clients) completed by Mackin that are most relevant to the type of work that is identified in the Request for Proposals. The Mackin Team has completed projects across the Commonwealth as well as the surrounding states of West Virginia, Ohio, and Maryland.

Water Trail Plans

- **West Branch of the Susquehanna River Water Trail** – Cambria, Clearfield, Clinton, Indiana, Lycoming, Northumberland and Union Counties, PA – Client: North Central PA Regional Planning and Development Commission
- **Ten Mile Creek Waterway Trail**—Greene and Washington Counties – Client: Jefferson Morgan Regional Council of Governments

Trail Projects - Feasibility Studies

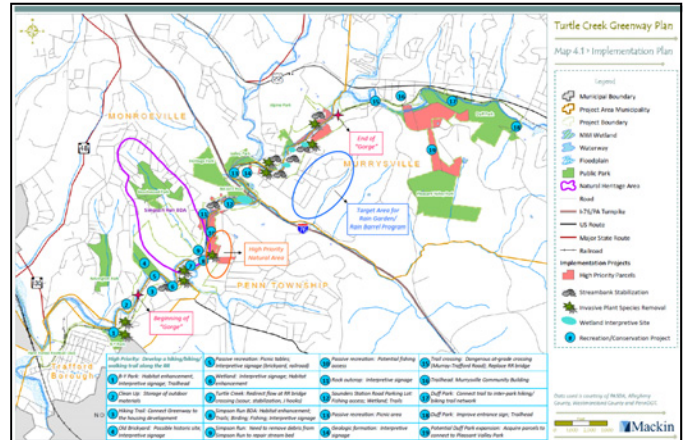

- **Ohio River Trail** – North Shore Trail Feasibility Study, Beaver County, PA – Client: Ohio River Trail Council-Stromberg/Garrigan Assoc. (10 miles)
- **Redbank Valley Trail Feasibility Study** and New Bethlehem Trail Town Master Plan, Client: Redbank Valley Trail Association (40 miles)
- **ATA Master Implementation Plan**, Pittsburgh, PA to Cumberland, MD - Client: Allegheny Trail Alliance (+90 miles)
- **ATA Trail System Construction Needs Assessment**, Pittsburgh, PA to Cumberland, MD - Client: Allegheny Trail Alliance (+90 miles)
- **Lawrenceville Trail Feasibility Study**, Pittsburgh, PA - Client: PA Environmental Council (5 miles)
- **Corry Junction Trail Master Plan**, Erie County, PA, - Client: Northwest PA Trail Association (5 miles)
- **Allegheny Highlands Trail Feasibility Study**, Cumberland to Frostburg, Allegany County, MD - Client: Allegany Highlands Trail of Maryland **(15 miles of Rail-with-Trail and 5 Rail-to Trail)**
- **Countryside Conservancy Rail-Trail Feasibility Plan**, Lackawanna and Wyoming Counties, PA (20 miles)
- **Erie County Rail-Trail Feasibility Study**, Erie County, PA - Client: Erie County (+40 miles)
- **Frostburg Trail Feasibility Study**, Frostburg, Allegany County, MD - Client: City of Frostburg (15 miles)
- **Loyalhanna Trail Feasibility Study** (and Environmental Assessment), Westmoreland County, PA – Client: Loyalhanna Watershed Association
- **Perryopolis Trail Feasibility Study**, Perryopolis, Fayette County, PA - Client: Perryopolis Borough
- **Saltsburg to Trafford Trail Feasibility Study**, Westmoreland County, PA - Client: Westmoreland County
- **Sheepskin Trail Feasibility Study**, Fayette County, PA - Client: Fayette County Office of Planning and Community Development (30 miles)

SECTION 4: RELEVANT PROJECT EXPERIENCE

Greenways Plans

- **Greene County Greenways and Trails Plan**, Greene County, PA – Client: Greene County Office of Planning and Development
- **Kiskiminetas Valley Greenway Study**, Westmoreland, Armstrong and Indiana Counties, PA – Client: Allegheny Ridge Corporation
- **Turtle Creek Greenways Plan**, Westmoreland and Allegheny Counties, PA – Client: Westmoreland County Parks and Recreation Department
- **Southwest Adams County Multi-municipal Greenways Plan**, Adams County, PA – Client: Adams County Department of Planning
- **Washington County Greenways and Trails Plan** (includes Open Space Component), Washington County, PA – Client: Washington County Planning Commission

Recreation, Park and Open Space Plans

- **Franklin Park Borough**, Allegheny County, PA – Client: Franklin Park Borough Parks and Recreation Dept.
- **Greene County**, Greene County, PA – Client: Greene County Office of Planning and Development
- **Moon Township**, Allegheny County, PA – Client: Moon Township Parks and Recreation Department

Watershed Management Plans

- **Pine Creek Watershed Conservation Plan**, Allegheny County, PA – Client: North Area Environmental Council
- **South Fayette Visual Watersheds Assessment**, Allegheny County, PA – Client: South Fayette Conservation Group
- **South Sandy Creek Preliminary Watershed Assessment**, Mercer and Venango Counties, PA - Client: Trout Unlimited, Oil Creek Chapter
- **Upper Laurel Hill Creek Preliminary Watershed Assessment**, Somerset County, PA - Client: Somerset Conservation District
- **West Branch Codorus Creek Preliminary Watershed Assessment**, York County, PA - Client: Trout Unlimited, Codorus Creek Chapter

River Conservation Plans

- **Monongahela River Conservation Plan**, Fayette and Washington Counties, PA - Client: Brownsville Borough
- **Monongahela River Conservation Plan**, Allegheny, Fayette, Greene, Washington, and Westmoreland Counties, PA - Client: Steel Industry Heritage Corporation
- **Swatara Creek Watershed River Conservation Plan**, Berks, Dauphin, Lebanon, and Schuylkill Counties, PA - Client: Swatara Creek Watershed Association

SECTION 4: RELEVANT PROJECT EXPERIENCE

- **Upper Codorus Creek Watershed River Conservation Plan**, York County, PA - Client: Trout Unlimited, Codorus Creek Chapter
- **Upper Crooked Creek Watershed River Conservation Plan**, Indiana County, PA - Client: Indiana County
- **West Branch Codorus Creek River Conservation Plan**, York County, PA - Client: Trout Unlimited, Codorus Creek Chapter
- **Youghiogheny River Conservation Plan**, Allegheny, Fayette, and Westmoreland Counties, PA - Client: Regional Trail Corporation

Comprehensive Waterways Plans

- **Oil City Comprehensive Waterways Plan**, City of Oil City, Venango County, PA – Client: Oil City

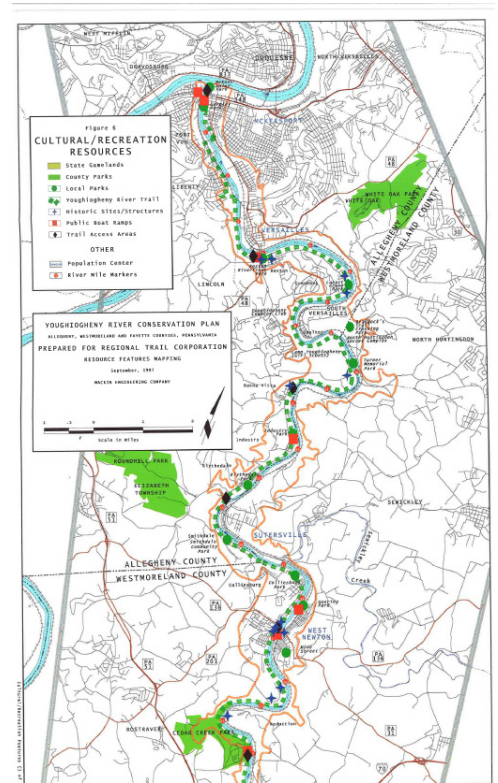

Management Action Plans - State and Federal Heritage Areas

- **Canal Place Heritage Area Management Plan**, Allegany County, MD – Client: City of Cumberland
- **Lumber Heritage Region Management Action Plan**, Fifteen County Region in North Central PA - Client: North Central PA Regional Planning and Development Commission
- **Oil Heritage Region Management Action Plan Update**, Crawford and Venango Counties, PA - Client: Oil Heritage Region, Inc.
- **PA Wilds, 12-County Region in North Central Pennsylvania** – Client: North Central PA Regional Planning and Development Commission

Water Resources Management Plan

- **Laurel Hill Creek Watershed – Land Use Component**, Somerset County, PA – Client: Somerset County Conservation District
- **Back Creek Watershed Land Use Plan**, Somerset County, PA – Client: Mountain Watershed Association

SECTION 5: RESUMES

Ohio River Water Trail Map & Guide Preparation

Brandi M. Rosselli, AICP

As Manager of the Planning Services Department at Mackin, Ms. Rosselli is responsible for overseeing the planning department staff as well as the overall management and review of all department projects, assignment of personnel to projects, and workload distribution. Ms. Rosselli also oversees the supervision, professional development, and performance evaluation of all department staffing. In addition, Ms. Rosselli is responsible for preparing technical and cost proposals when pursuing new planning projects.

Ms. Rosselli's professional experience includes participating on the following projects:

- Lycoming County Municipal Corridors Plan, Lycoming County, PA - Client: Lycoming County Planning Department
- Canal Place Heritage Area Management Plan Update, Allegany County, MD - Client: City of Cumberland
- Comprehensive Recreation, Park, & Open Space Plan, Moon Township, Allegheny County, PA - Client: Moon Township
- Lawrence County Comprehensive Plan Update, Lawrence County, PA – Client: Lawrence County
- Allegheny County Comprehensive Plan, Allegheny County, PA – Client: Allegheny County Department of Economic Development
- Washington County Comprehensive Plan, Washington County, PA - Client: Washington County Planning Commission
- Green Tree Comprehensive Plan, Allegheny County, PA
- City of Clairton Comprehensive Plan, Allegheny County, PA – Client: City of Clairton
- City of Meadville Comprehensive Plan Update, Crawford County, PA - Client: City of Meadville
- Washington / East Washington Multi-Municipal Comprehensive Plan, Washington County, PA – Client: Redevelopment Authority of Washington County
- Donegal / Claysville Multi-Municipal Comprehensive Plan, Washington County, PA – Client: Redevelopment Authority of Washington County
- Southern Indiana County Cooperative Communities Comprehensive Plan, Indiana County, PA - Client: Indiana County Office of Planning and Development

EDUCATION:

Washington & Jefferson College, Bachelor of Arts - Sociology
University of Pittsburgh - Master of Urban & Regional Planning

REGISTRATION/AFFILIATIONS:

American Institute of Certified Planners, 2002
Pennsylvania Chapter of the American Planning Association (PA APA) – Member since 2002;
Southwest Section - Secretary (2005-2008)

EXPERIENCE:

Years with Mackin: 5 Years with other firms: 7

SECTION 5: RESUMES

Amy L. Wiles, AICP

Ms. Wiles serves as Lead Senior Planner in the Planning Services Department at Mackin. In this capacity, she manages several planning projects as well as assists the department manager in the development of technical and cost proposals for new projects. Ms. Wiles' professional experience crosses a variety of disciplines, ranging from county and multi-municipal comprehensive plans to specialized planning studies, such as a transit revitalization investment district (TRID) study, to parks, recreation, trails and greenways plans. Ms. Wiles currently also serves as the Geographical Information Systems (GIS) coordinator for Mackin and is responsible for data management, creation, and production. In addition, she offers extensive experience in the facilitation of public meetings and incorporating public involvement into projects that fall outside of the planning discipline.

Ms. Wiles' professional experience includes participating on the following projects:

- Kiskiminetas Valley Greenway, Trails, and Downtown Connectivity Study, Armstrong, Indiana and Westmoreland Counties, PA – Client: Allegheny Ridge Corporation
- Ohio River Trail – North Shore Trail Feasibility Study, Beaver County, PA – Client: Ohio River Trail Council
- Redbank Valley Trail Feasibility Study, Armstrong, Clarion and Jefferson Counties PA – Client: Redbank Valley Trails Association
- Irwin Trails Feasibility Study, Westmoreland County, PA - Client: Irwin Borough
- Loyalhanna Trail, Westmoreland County, PA - Client: Loyalhanna Watershed Association
- Corry Junction Greenway Trail Master Plan & Design, Erie County, PA – Client: Northwest Pennsylvania Trail Association
- Countryside Conservancy Rail-Trail Feasibility Plan, Lackawanna & Wyoming Counties, PA - Client: Countryside Conservancy
- Saltsburg to Trafford Trail Feasibility Study, Westmoreland County, PA - Client: Westmoreland County Parks & Recreation Department
- Erie County Rail Trail Feasibility Study, Erie County, PA - Client: Erie County Planning Department
- Countywide Comprehensive Recreation, Park, & Trails / Greenways Plan, Greene County, PA - Client: Greene County
- Northwest Butler County Multi-Municipal Comprehensive Recreation Plan and Master Site Plans, Butler County, PA - Client: Butler County
- Turtle Creek Greenways Plan, Allegheny and Westmoreland Counties, PA – Client: Regional Trail Corporation

SECTION 5: RESUMES

Lesley A. Lentz

Ms. Lentz serves as the Manager of Marketing and Graphic Communications for Mackin, with over nine years experience in managing Mackin's graphics and marketing support staff. Ms. Lentz uses an innovative approach in the design and development of project reports, presentation graphics, promotional items, and various marketing media. Providing clients with the creative tools and solutions needed to suitably address their project needs. Ms. Lentz's professional experience and responsibilities include:

- Coordinating and implementing marketing communication projects including advertising, public relations, special events management, and creating brand awareness
- Organizing the preparation of proposals and presentations
- Layout and design of marketing proposals, project reports, and presentation material
- Developing and implementing strategic marketing plan for the organization
- Coordinating and overseeing printing for presentation and promotional materials, and project reports (in-house and outsourced)
- Using knowledge of current graphic design software to produce graphic art and visual materials for promotions, advertisements, and informative material
- Generating and manipulating graphic images, as well as image enhancement with the use of Adobe Photoshop CS3, Illustrator CS3
- Remaining abreast of technological advances in the field and being able to identify areas of use in the organization
- Supervising creative design, directing and developing final images that communicate the organization's marketing objective
- Coordinating with the Mackin IT Department for the design and development of our Company website

Internal Development

- Coordinating with the Mackin IT Department in developing the Project Opportunity Evaluation (POE) program. The POE tracks and submits marketing information into the Mackin marketing database. All data is tracked on a per-user basis. After submission the data is sent to the appropriate principal for approval. Upon principal approval the data gets transferred into the marketing database. All managers and principals that are part of the submitted marketing project get notified both in the initial submission and upon approval.
- Coordinating with the Mackin IT Department in developing the Marketing Reporting System. Each report of the system is customizable with multiple selection criteria. The reports may be viewed as a data-grid or in a printable PDF format. The data-grid includes additional filtering options as well as sorting options.

EDUCATION:

Mercyhurst College, B.A. - *Graphic Design*

EXPERIENCE:

Years with Mackin: 9

Years with other firms: 0

William Moldovan, RLA, ASLA

As Senior Landscape Architect of Mackin's Land Development Services, Mr. Moldovan has extensive experience in multiple phases of land development and landscape architecture projects including government site planning policies and procedures, military master planning, park master planning, environmentally sensitive and sustainable design, and construction project management.

Mr. Moldovan's professional experience includes the following projects:

- Redbank Valley Trail Feasibility Study and New Bethlehem Trail Town Master Plan, Client: Redbank Valley Trail Association
- Redbank Valley Trail New Bethlehem Borough Design and Engineering Services, New Bethlehem Borough, PA - Client: Redbank Valley Trail Association
- Great Allegheny Passage (GAP) at McKeesport, Engineering and Design for a 5-mile Urban Trail Project, Allegheny County, PA, Client: Regional Trail Corporation
- Corry Junction Trail, Engineering and Design for a 5-mile rail-to-trail project, Erie County, PA, Client: Northwest PA Trail Association
