RE: Ohio River Water Trail Map and Guide Preparation

Dear Vincent:

Thank you for inviting us to submit this proposal for assisting to prepare a PA Fish and Boat Commission-like Ohio River Water Trail Map and Guide. Our proposal consists of:

1. Cover Letter
2. Cost Proposal & Project Schedule
3. Consultant Qualifications
4. Examples of Work
5. Ohio River Water Trail Base Map – prepared for the preparation of this proposal

We have carefully reviewed your request for proposals, projected the amount of time associated with completing each task based on our past experiences in completing similar work and projected the fees associated with completing this project.

As you are aware, two of our firm's four partners reside in Beaver County. The Ohio River Trails are located in our backyards. Towards that end we are committed to donating time to complete this scope of work within the budget you have for the project. Our donations are reflected on the attached Cost Proposal.

Further, we propose to utilize a Beaver County based business, Professional Graphic Communications (PGC) located in Economy Borough, should you elect the option to print copies of the map. PGC has held a contract to print products for the Beaver County Recreation & Tourism Department for a number of years.

As you may be aware, Pashek Associates is well versed in PA DCNR and PA Fish and Boat Commission work. I was selected by DCNR to author their forthcoming publication *"Pennsylvania Trail Design & Development Principles: Guidelines for Sustainable, Non-motorized Trails."* Further, the Deputy Director of the PA Fish and Boat Commission selected us directly to assist the Commission in developing a plan for the future of Hereford Manor Lakes.

The scope of services suggests the final map will include geographic information system layers such as topography, bridges, roads, railroads,

hydrology, public lands [local, state, and federal parks, forests, and game lands], locks and dams, river miles, land trails, public access points, and state county and municipal boundaries. Additionally, points of interest along the water trail are to include access points, dam portages, and campgrounds; and various inserts are suggested.

While this information can be important to the numerous project stakeholders; it will be necessary to find a balance between graphic layout, map scale, and important features or key points of interest directly related to the Ohio River Water Trail in order to create a visually appealing and easily understood graphic product on the page size and format requested in the RFP.

We can assist you in making these decisions. We pride ourselves on finding that balance in a unique way, satisfying all project stakeholders while producing a user-friendly high quality end product.

To complete this work we propose to bill the ORTC on a time and materials basis not to exceed \$14,980 for the base scope of services. Should we complete the scope of work in fewer hours than projected, we will pass that savings on to the ORTC.

Further, we have identified a potential to reduce this fee by \$3,000 should the ORTC decide it would be to the organization's benefit to conduct the reconnaissance as an in-kind service to the project. If this reduction is accepted, then it is possible the ORTC could also include the printing of 10,000 copies of the map within the \$15,000 budget.

Should ORTC select to print copies of the map, ORTC could contract directly with Professional Graphics Communications for the printing, or Pashek Associates could coordinate the printing with PGC for the fee which corresponds to the amount of copies desired, as identified on the attached Cost Proposal.

We look forward to partner with ORTC on this important initiative, and we look forward to the opportunity to provide our services to you.

Should you have any questions during the review of our proposal please feel free to give me a call.

Sincerely,

A handwritten signature in blue ink, reading "John O. Buerkle, Jr." with a stylized flourish at the end.

John O. Buerkle, Jr., RLA, AICP
Vice President

COST PROPOSAL & SCHEDULE

Assumptions Related to Our Scope of Work and Corresponding Fee Projections

1. ORTC will identify a subcommittee of up to four representatives that will serve as a the primary points of contact and coordinate the reviews of the larger ORTC body. This subcommittee will vet and provide final decisions and direction to the consultant on behalf of the ORTC.
2. For the safety of our staff in conducting the reconisance in task 2.1.2, we request that ORTC provide a least one person, kayak, and appropriate equipment to outfit the volunteer, to join our staff member on the water.
3. For Task 2.1.4, Ohio River Reconisance, our fee is based on our staff completing it motorboat and that we will secure a motor boat for the reconisance.
4. All site reconisance will occur during standard weekday business hours.
5. We believe the ORTC has dedicated members with the ability and background to conduct the additional river reconisance identified in Task 2.1.2. As such, if the reconisance is conducted by ORTC members in its entirety and excluded from our scope of work, a savings of \$3,000 could be acheived. That said the RFP and subsequent responses to questions indicated it is ORTC desire to have us include this work, as we did, in our proposal at this time. However, if the savings is apealing to the ORTC we are open to discussing how it can occur.

Ohio River Water Trail Map

Scope of Work & Cost Proposal

Tasks to be performed will include the following, working in close collaboration with the Ohio River Water Trail Committee of the Ohio River Trail Council.

Item No.	Task	Pashek Associates			
		John Buerkle	Mike Kotyk	Sara Thompson	Reimbursable Expenses
2.1	Compile and Review Existing Information and Base Maps	-	Donated	-	-
2.1.1	Review and compile existing Geographic Information System (GIS) base maps that are available from the PA Fish & Boat Commission (PFBC), Pennsylvania Spatial Data Access (PASDA) and other regional plans. These maps will include: topography [digital elevation], bridges, roads, railroads, hydrology, public lands [local, state, and federal parks, forests, and game lands], locks and dams, river miles, land trails, public access points, and state, county and municipal boundaries	-	Donated	-	-
2.1.2	Assess corridor by boat identifying and verifying existing and potential access points, hazards along the river, and opportunities along the river. Acquire additional GPS points as needed. ORTC has compiled 529 PowerPoint slides with much of this information (see Attachment C)	See Below	See Below	See Below	\$750
2.1.2.1	Little Beaver Creek	-	8	-	-
2.1.2.2	Raccoon Creek	-	4	-	-
2.1.2.3	Beaver River	-	4	-	-
2.1.2.4	Ohio River	-	24	-	-
2.1.3	Review relevant planning documents related to trails and greenways for this region including county greenway and trail plans to be provided by the ORTC.	-	Donated	-	-
2.2	Prepare Base Maps for the Map	-	8	-	-
2.2.1	The refinement of mapping will include compiling the various sources of mapping information into one large base map with possible segment insets and adding additional (non GIS) information.	-	8	4	-
2.2.2	Mapping should be completed in GIS, or in another format that is agreeable to the ORTC, and it should be in a format that allows information to be updated over time;	-	-	-	-
2.2.3	GIS layers will include the following information: major and minor roads, hydrology (major rivers and streams), state, county and municipal boundaries, public lands (forests, game lands, parks, county and municipal parks), existing and proposed trails (including the Ohio River Land Trail), digital elevation, public and key private access points (provided by client) and river miles (refer to ATTACHMENT B for a complete list of map layers);	-	-	-	-
2.2.4	Revise maps to incorporate additional points of interest, labeling, and text to include interpretive, visitor use, and safety information (ORTC will provide lat/long of most all points of interest and brochure text);	2	8	16	-
2.2.5	Prepare inset maps, if needed, that show more detail of the tributaries, and including directions to access points, dam portages, campgrounds (ORTC will provide lat/long of most all points of interest and brochure text);	2	8	8	-
2.2.6	Prepare two index maps: 1) showing the location of the Ohio River Water Trail to PA, WV, and OH; and 2) showing the location of the various inset maps, as needed.	-	2	-	-
2.3	Preparation of Water Trail Map	-	-	-	-
2.3.1	Export maps for graphic design, in a mutually agreed upon format such as an EPS file, for the design and layout of trail map/guide;	-	4	2	-
2.3.2	Design and layout the text side and map side of a visually aesthetic and easy-to understand and use water trail map. The design should adhere to other water trail map and guides that are available on the PA Fish and Boat Commission web site (http://fishandboatcom/watertrails/);	2	8	16	-
2.3.3	Assist the ORTC with creation of a water trail logo. Provide logo in vector format, JPG format and incorporate into the PFBC Water Trail logo standard.	Donated	-	-	-
2.3.4	Segment the map/guide into easy-to-use and easy-to-read pages for website publication. Provide maps in 8.5 x 11" printable format, preferably in an Adobe PDF format or similar universal format	1	3	6	-
2.3.5	Work with ORTC to ensure that the map is correctly printed with the correct specifications for a high quality product.	-	-	8	-

Ohio River Water Trail Map

Scope of Work & Cost Proposal

Tasks to be performed will include the following, working in close collaboration with the Ohio River Water Trail Committee of the Ohio River Trail Council.

Tasks Not Identified but Anticipated					
3.1	Attend up to three meetings during course of work with steering committee representatives	Donated	12	-	Mileage & Travel Time Donated
Deliverables					
1)	GIS files (i.e. shape files) of base mapping, for future map updates.	-	-	-	n/c
2)	Graphic design files (i.e. EPS files) of the map/guide ready to take to the printer.	-	-	-	n/c
3)	Website files of the map (i.e. PDF format), segmented into 8" x 11" pages for printing by the general public.	-	-	-	n/c
4)	Logo design (i.e. JPG format with EPS file available).	2	-	4	-
Subtotal Hours		9	101	64	
Hourly Rate		\$135	\$75	\$85	
Subtotal Fee		\$1,215	\$7,575	\$5,440	\$750
TOTAL FEE					\$14,980

Optional Printed Map		
Option A	Print 10,000 copies of map in accordance with the specifications below	\$3,324
Option B	Print 20,000 copies of the map in accordance with the specifications below	\$5,239

Specifications for Optional Printed Map	
2.4	Publication of Map
2.4.1	ORTC will retain the option to finance the printing of the Map under separate contract Please provide your bid with and without the inclusion of printing costs.
2.4.2	Printing specifications are:
2.4.2.1	Trim Size of Paper: 16.50" x 21.75"
2.4.2.2	Paper Stock: House Gloss 1 OO#T - White (.0055)
2.4.2.3	Ink: 4/4: -4/C Process over 4/C Process
2.4.2.4	Proof: One set of digital proofs included
2.4.2.5	Bindery: Cut, fold, shrink-wrap, carton pack
2.4.2.6	Quantity
2.4.2.7	Press-ready digital file supplied

Ohio River Water Trail Map

Project Schedule

Item No.	Task	2012		2013						
		Nov	Dec	Jan	Feb	Mar	Apr			
2.1	Compile and Review Existing Information and Base Maps									
2.1.1	Review and compile existing Geographic Information System (GIS) base maps that are available from the PA Fish & Boat Commission (PFBC), Pennsylvania Spatial Data Access (PASDA) and other regional plans. These maps will include: topography [digital elevation], bridges, roads, railroads, hydrology, public lands [local, state, and federal parks, forests, and game lands], locks and dams, river miles, land trails, public access points, and state, county and municipal boundaries									
2.1.2	Assess corridor by boat identifying and verifying existing and potential access points, hazards along the river, and opportunities along the river. Acquire additional GPS points as needed. ORTC has compiled 529 PowerPoint slides with much of this information (see Attachment C)									
2.1.2.1	Little Beaver Creek									
2.1.2.2	Raccoon Creek									
2.1.2.3	Beaver River									
2.1.2.4	Ohio River									
2.1.3	Review relevant planning documents related to trails and greenways for this region including county greenway and trail plans to be provided by the ORTC.									
2.2	Prepare Base Maps for the Map									
2.2.1	The refinement of mapping will include compiling the various sources of mapping information into one large base map with possible segment insets and adding additional (non GIS) information.									
2.2.2	Mapping should be completed in GIS, or in another format that is agreeable to the ORTC, and it should be in a format that allows information to be updated over time;									
2.2.3	GIS layers will include the following information: major and minor roads, hydrology (major rivers and streams), state, county and municipal boundaries, public lands (forests, game lands, parks, county and municipal parks), existing and proposed trails (including the Ohio River Land Trail), digital elevation, public and key private access points (provided by client) and river miles (refer to ATTACHMENT B for a complete list of map layers);									
2.2.4	Revise maps to incorporate additional points of interest, labeling, and text to include interpretive, visitor use, and safety information (ORTC will provide lat/long of most all points of interest and brochure text);									
2.2.5	Prepare inset maps, if needed, that show more detail of the tributaries, and including directions to access points, dam portages, campgrounds (ORTC will provide lat/long of most all points of interest and brochure text);									
2.2.6	Prepare two index maps: 1) showing the location of the Ohio River Water Trail to PA, WV, and OH; and 2) showing the location of the various inset maps, as needed.									
2.3	Preparation of Water Trail Map

4)	Logo design (i.e. JPG format with EPS file available).									
5)	Optional Printed Map									

CONSULTANT QUALIFICATIONS

John O. Buerkle, Jr., RLA, AICP Vice President, Pashek Associates

PROJECT MANAGER, PROJECT COORDINATION, QUALITY CONTROL

John will serve as project manager, provide project coordination, and provide quality control. He will lead our project team's efforts in producing a high quality map/guide for the Ohio River Water Trail.

John O. Buerkle, Jr. is a registered landscape architect, an AICP-certified planner, and Vice President of Pashek Associates. John leads Pashek Associates Park and Recreation Studio. He is well versed in community planning, trail planning and design, pedestrian and bicycle facility planning and design, and park and recreation facility design.

Nationally, John is recognized as a leading expert on sustainable trail design. John has been invited to speak at National Off-Highway Vehicle Conservation workshops and symposiums. John is also recognized state-wide as an expert on sustainable trail design.

John was selected by PA DCNR to author their latest publication "*Sustainable Non-Motorized Trails for Pennsylvania*." This document provides a compilation of best practices and guidelines for the planning, design, construction, operation, and maintenance of trails in PA.

John's work includes planning and design of water trails, rail-trails, equestrian trails, mountain bike trails, OHV trails, numerous other bike/hike trails and greenways. John participates in various professional organizations, including American Trails and the Rails-to-Trails Conservancy, bringing knowledge and experience in the latest developments in the areas of trail, pedestrian, and bicycle facility planning and design to your project.

Mike Kotyk

GIS MAPPING, RECONNAISSANCE & GRAPHIC LAYOUT

Mike is an integral team member in all greenway and trail projects at Pashek Associates. He is dedicated to providing high quality, user-friendly map products.

Mike recognizes that it is necessary to find a balance between graphic layout, map scale, and important features or key points of interest related to a project area in order to create a visually appealing and easily understood graphic map product. With his experience in producing map products Mike can assist you in making these decisions. Mike prides himself in finding that balance, satisfying all project stakeholders while producing a user-friendly high quality end product.

Mark Geise, Deputy Director of Planning and Economic Development for Chautauqua County NY, recently praised Mike for his work as follows:

“Pashek has GIS capabilities that are second to none. They worked with the County in developing a Greenway Plan which was a GIS-Driven project that featured ALL of the County’s natural and man-made assets via GIS Mapping and Graphic Design. Pashek is becoming known for their GIS capabilities as they arguably have one of the sharpest and most capable GIS operators in the area – Mike Kotyk. They are highly respected and qualified, and are recognized regionally/nationally as experts in GIS Mapping and Graphic Design.”

Timothy Bruno, Watershed Manager, Pennsylvania Department of Environmental Protection Northwest Regional Office, states:

“Mike Kotyk’s GIS abilities and work products are some of the best that I’ve seen during my professional career. He’s consulted on several projects that I’ve been involved with and his GIS and visual presentations are eye-catching and thought-provoking. His unique and super-useful “Greenprint” analysis methodology has received much attention in several Commonwealth agencies. I highly recommend Mike and the skills that he can bring to his clients.”

Mike is also co-owner of OTB, a bike-themed cafe marketed to provide food and drink to those cycling the Three Rivers Heritage Trail. OTB sponsors weekly urban bike rides of Pittsburgh's neighborhoods and downtown.

OTB Bicycle Cafe - Southside Pittsburgh

Personally Mike is an avid cyclist. Mike often commutes to work by bicycle, and he and his family are often on the trails on the weekends. In addition to participating in many rides throughout Pennsylvania, Mike and his wife also ride in the New York City Five Borough's Ride each year. Further, Mike is an advocate for increasing the safety of pedestrian and cycling opportunities within and around the City of Pittsburgh. Mike recently received a proclamation from the City of Pittsburgh for leading efforts to improve the cycling infrastructure in the City of Pittsburgh.

Mike was recently appointed to the BikePGH Board of Directors and he has been invited to sit on the host committee for the North American Pro Walk/Pro Bike Conference to be held in Pittsburgh in 2014.

Mike & Aidan Fishing on the Allegheny River

In his free time Mike enjoys spending time on the Allegheny River in his tandem kayak with his wife and two children.

Sara Thompson, MLA, RLA

GRAPHIC DESIGN, LAYOUT & COPY

Sara will participate in this project as a graphic design, layout and copy specialist. Sara has developed Pashek Associates digital imaging studio, raising the bar and the capability of graphic production within the firm.

Sara serves on the Board of Directors of the Pittsburgh Trails Advocacy Group (PTAG). PTAG's mission is to protect and encourage access to shared-use trails in Western Pennsylvania. We are especially concerned with single-track trails used by mountain bikers, hikers, trail runners, cross-country skiers and equestrians.

Professional Graphic Communications

PRINTING

Professional Graphic Communications, Inc. Vision

To bring to life the essence of each customer's vision within an environment of creativity, originality, skill, and excellence.

Should the ORTC elect to have copies of the the map printed, we would use Professional Graphic Communications, Inc. (PGC). PGC is located in Economy Borough, on Big Sewickley Creek Road, is a customer-driven provider of design, printing, mail, web development, fulfillment, and distribution services.

PGC has held a contract to print products for the Beaver County Recreation & Tourism Department for a number of years.

Professional Graphic Communications (PGC) serves the printing needs of organizations of every size, from small family-run businesses to large corporations. From one-color letterhead to five-color catalogs with die-cutting, binding and coatings, PGC's committed professionals deliver on every job.

We understand the dynamics of managing a successful print program and provide the quality, consistency and rapid turn-around times necessary to ensure that its objectives are met. Whether your needs include catalogs, brochures, annual reports, direct mail postcards, product packaging, business forms or labels, PGC is the company that can make you look good on paper.

PGC strives to exceed the expectations and standards of each of the local, regional and national customers we serve through continual innovation and improvement in our products and services.

PGC is dedicated to maintaining and strengthening our position as an industry leader through ongoing growth and investment in technological advancement. PGC bases its integrity on ongoing, mutually enriching relationships with our customers, suppliers, employees, and community.

- 2010 International Mountain Biking Association Trail Care Crew Training, 2006 Sustainable Trail Design
- 2010 National Off-Highway Vehicle Conservation Council Workshop

PROFESSIONAL EXPERIENCE

Pashek Associates, LTD., Vice President

John leads the firm's Parks and Recreation Studio. He is responsible for the leading pedestrian / bicycle, greenway, trail and open space planning, trail feasibility planning, and park master planning efforts of the firm. John is also responsible for the design, construction document preparation, and construction observation services provided to our clients. In our planning, John builds consensus among study committee members with diverse views, and assists them in developing a vision for the future of their park and recreation facilities. John's expertise in recreation facility design and construction ensures the end users will enjoy their facility for many years to come. During construction, John utilizes experiences gained from managing over ten million dollars of recreation facility development to guide projects through to successful a conclusion. John joined Pashek Associates in 1989 upon graduating from Pennsylvania State University.

LETTERS OF RECOMMENDATION

May 31, 2012

Mr. Denny Puko, Chairman
Awards Committee - American Planning Association, PA Chapter
587 James Drive
Harrisburg, PA 17112

Subject: Austin Borough submission for *Planning Excellence Award*

Dear APA-PA Awards Committee,

As professional AICP planner and DCED project manager for PA's Central region, I have the opportunity to work with scores of communities on their planning initiatives. From its inception, the Austin Plan sought higher expectations than typical planning processes. This little remote Borough of less than 600 population (and declining) hosts a unique historic asset and has an even more unusual story to tell. However, recognizing their size and location, Austin knew that their journey to sustaining their future and putting themselves back on the map would take a stellar plan to set the stage. I believe they have accomplished just that.

I am writing in support of the nomination of "*The Dam Park at Austin: Master Plan and Economic Development Strategies*" for the **2012 Planning Excellence Award** from the Pennsylvania Chapter of the American Planning Association. The plan was fostered by the combined efforts of the Austin Dam Memorial Association, Austin Borough and Potter County Visitors Association to revitalize the community of Austin, Pennsylvania by capitalizing on the unique history of that community, through an in-depth planning process.

The combination of DCNR funds to craft a Master Plan for the Austin Dam Memorial Park, adjacent to the Borough, and DCED funds to assist with community revitalization and economic development planning allowed for a thoughtful asset-based strategic plan to emerge. The project exceeded DCED expectations. It established the foundations and

relationships necessary for making Austin a destination within the PA Wilds, the Pennsylvania Lumber Heritage Region, and the PA U.S. Route 6 planning initiatives.

Together with their planning consultants, Pashek Associates and Alberton Vernon Architects, the project team crafted a plan with an immense amount of originality and innovation. The development of a Main Street Master Plan with economic revitalization strategies, the Park Master Plan, and the Interpretation demonstration projects exhibited an extraordinary level of analysis, graphic quality, and ability to guide their client toward implementation. Furthermore, the completion of an “Implementation Workbook” accompanied the plan to prioritize activities and assist with tracking progress on implementation.

I hope you will find the Dam Plan for Austin a successful applicant for the APA-PA Excellence Award.

Respectfully,

Kim E Wheeler

DEPARTMENT OF CONSERVATION
AND NATURAL RESOURCES

BUREAU OF RECREATION AND CONSERVATION

May 25, 2012

Mr. Dennis Puko, Local Government Policy Manager
Department of Community and Economic Development

Dear Mr. Puko:

It is with great pleasure that I am writing you in support of the nomination of *The Dam Park at Austin: Master Plan and Economic Development Strategies* for the category of planning excellence. This category is the perfect description of the entire planning process that the Borough of Austin (our grantee), the Austin Dam Memorial Association, the Potter County Visitors Association and their consultant, Pashek Associates conducted that led to the development of this outstanding master site development plan.

Our Bureau awarded Austin Borough a *Keystone Recreation and Parks Fund* grant in 2008 because we saw the value in supporting the partnerships that were developing in the local community, as well as their efforts to create economic growth and sustainability by focusing on the promotion of their historic, cultural and recreational resources.

In addition to achieving these goals and furthering the mission of the Department of Conservation and Natural Resources, this plan has enhanced the pride-of-place that the residents of the Austin area have for their home. It has given the community a tool to effectively identify what they currently have, what they want and need, and what they must do to achieve their future goals and objectives.

At every step of the planning process the consultant made sure that the community was fully involved in this project, which resulted in the community becoming extremely vested in this master plan. This community participation is highly valued by DCNR, because the stronger the community involvement, the higher the likelihood of a master plan's recommendations becoming reality.

Thank you for this opportunity to speak positively about *The Dam Park at Austin: Master Plan and Economic Development Strategies*. Please contact me if you have any questions.

Sincerely,

Monica A. Hoffman, Ph.D., CPRP
Recreation & Park Adviser
Bureau of Recreation and Conservation

EXAMPLES OF WORK

Riverfrontiers

Stories of
Beaver County
& Its Rivers

ROCHESTER

In the late 1800s, a variety of businesses were located along the rivers in Rochester — it was the main part of town in that time.

Images left to right, Top: Advertisement for an Olive stove; the Olive Stove Works building; Middle: Beaver Valley Brewing sign; the tower section, now gone; Bottom: Riverside Carriage advertisement; Rochester Flour Mill promotional image; advertisement for Miller Lumber Yard. Right: Early view of Water Street in Rochester, in the background, the ferry landing in Monaca can be seen. (Notice the carriage in the foreground.)

Water, water everywhere... being on the river wasn't always good for business. Can you identify any former Water Street businesses in these photos? Can you see why many moved away from the rivers?

IN THE 1880s, the heart of Rochester lay on the flat stretch of land along the Ohio River. The main road, Water Street, was a perfect location for businesses for many reasons.

Proximity to the rivers and railroads meant heavy supplies could easily be transported to factories, and likewise, finished products could be carried away for sale. Many factories also needed a water source for steam, cooling or washing during their production processes. Unfortunately, rivers at that time were also an easy way to dispose of industrial wastes and the rivers became very polluted and remained so for years.

INDUSTRY ALONG THE BANKS

The businesses and factories set up between Water and Railroad Streets in Rochester manufactured a wide range of goods:

- 1 Wm. Miller & Sons Lumber Yard & Planing Mill 1875 – 1912
Provided all types of lumber including fine woods used in interiors of many grand buildings and homes in the region.
- 2 Olive Stove Works c. 1872
Produced coal and gas stoves, ranges for cooking and heating. Also created castings for many area glass companies.
- 3 Rochester Clay Pot Co. 1884 (closed by 1908)
Makers of fire bricks and bricks for paving and building. Originally built by Miller and Sons to produce crockery ware.
- 4 Rochester Roller Flour Mill 1883 – 1914
Produced various baking flours and feed.
- 5 Beaver Valley Brewing Co. 1903
(large building still standing) Produced Yale Export Ale and Porter. Later housed bowling lanes.
- 6 The Rochester Cut Glass Company 1896 – 1922
Produced cut glass items: tumblers, stemware and bowls.
- Point Bottle Works Company 1879 – 1906
Located at the point where the Ohio and Beaver rivers meet. Manufactured glass items including medicine bottles, liquor bottles, flasks and fruit jars — up to 180,000 bottles per day.
- Superior Coffin and Burial Casket Works c. 1876
Offered a variety of coffins and caskets. Their most expensive model was the walnut "Rochester Casket" for 17 dollars.

Based on a Sanbourn Map Co. insurance map of Rochester in 1908, the above map shows the industrial businesses that used to be here, along the Ohio River.

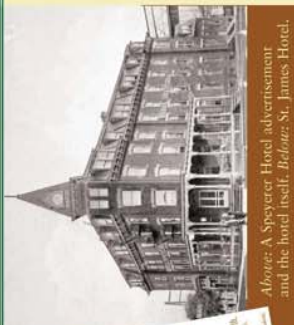

DISCOVERY QUESTION

Water, water everywhere... being on the river wasn't always good for business. Can you identify any former Water Street businesses in these photos? Can you see why many moved away from the rivers?

Stables on Water Street

Amidst the industry of Water Street stood the Speyer Hotel. Built in 1891, the hotel offered guests views of the Ohio River and amenities such as steam heat and an elevator. Because of the hotel's proximity to the river and rail lines, a special room was retained here by H.C. Fry to conveniently showcase Fry Glassware (manufactured in north Rochester) to out-of-town buyers. After only 39 years of service, the hotel was demolished.

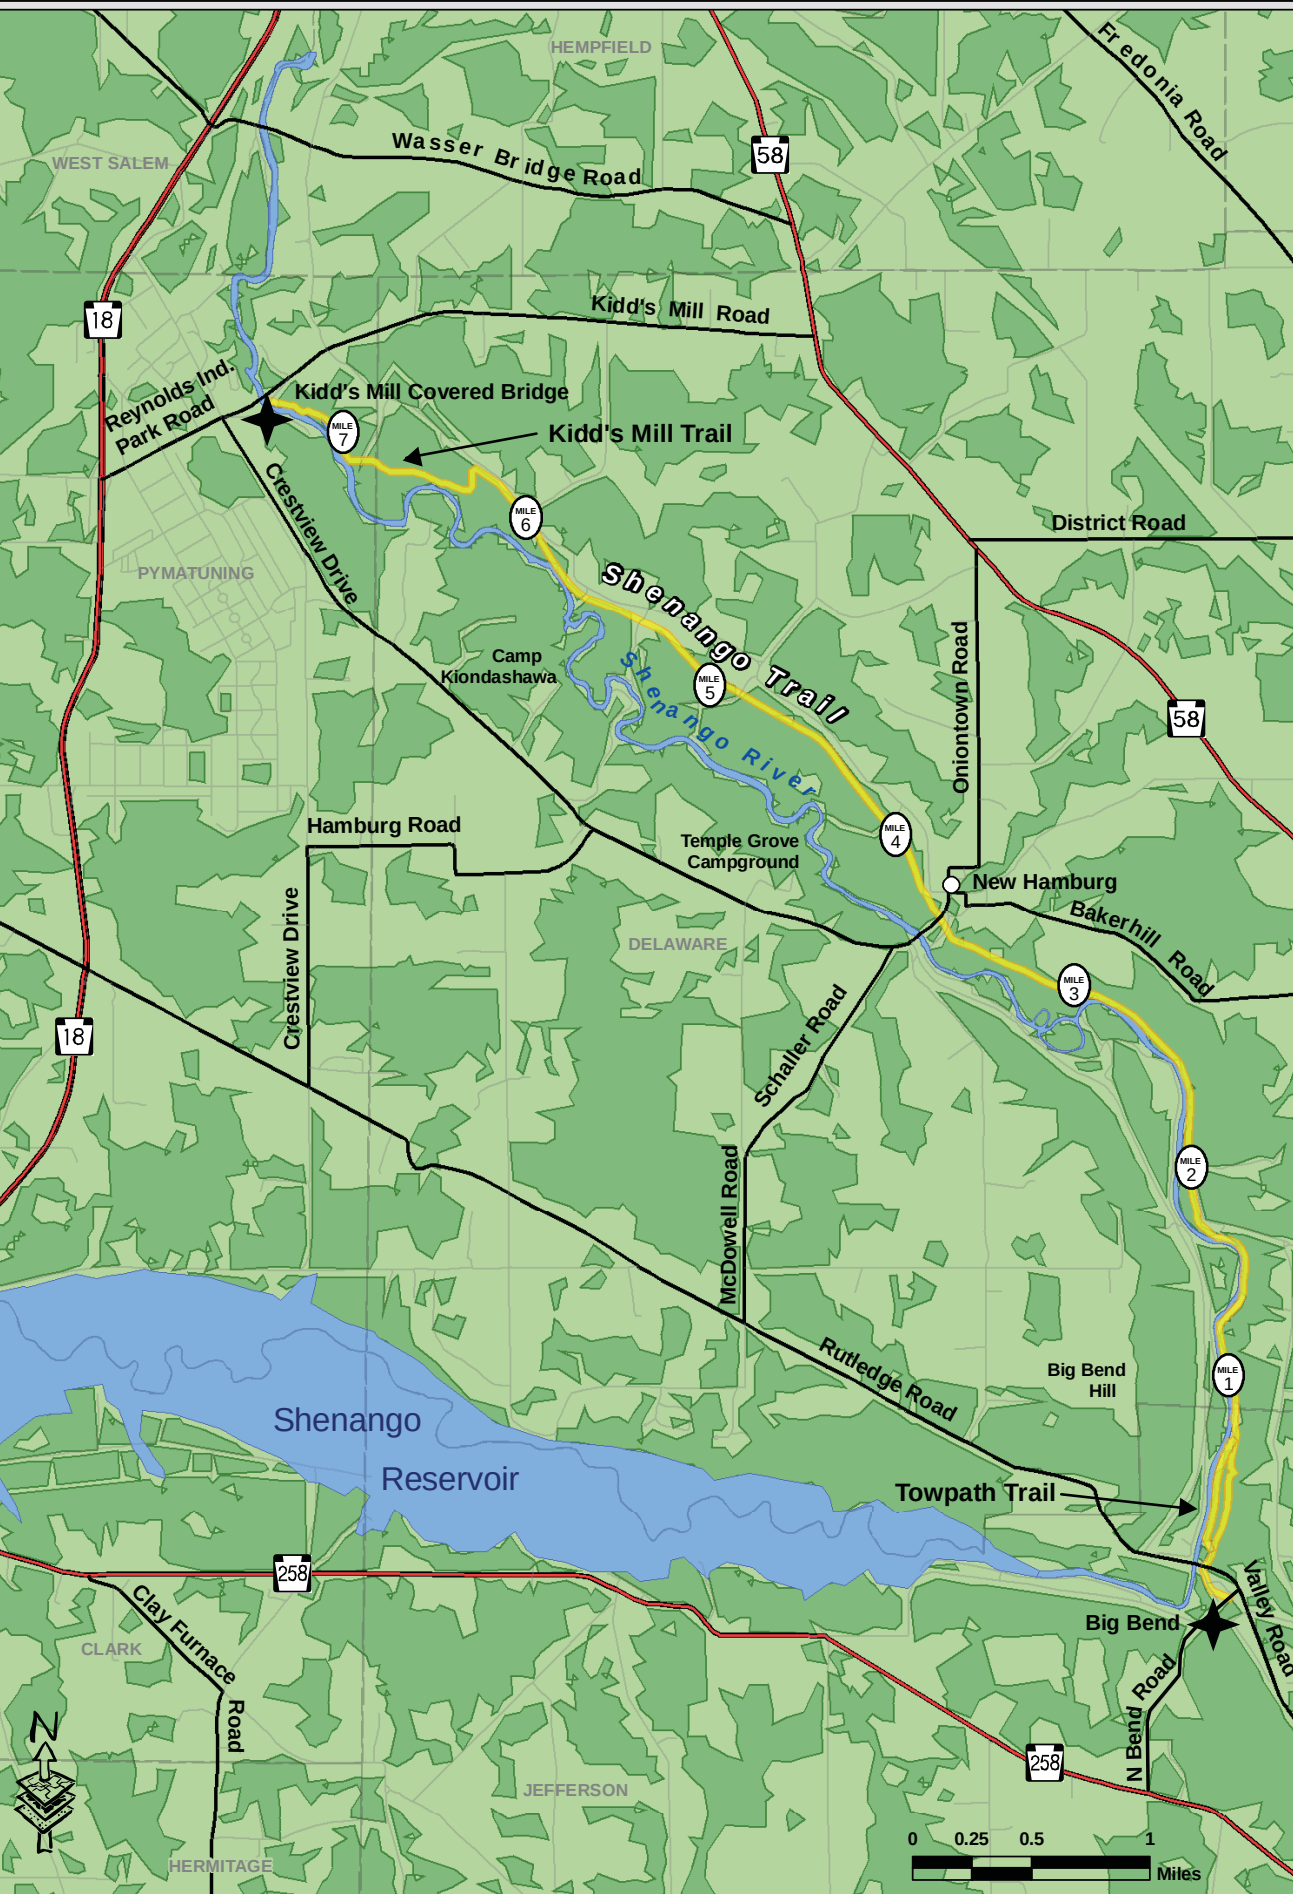

Another, smaller hotel — the St. James — was also located on Water Street (past the Brewery site). The hotel, once known as the Pavilion, operated under various names between 1848 and 1937. Early advertisements boast "the place to meet old friends. It is a home as well as a hotel." The St. James offered a large "up-to-date" bar, stables for horses, and "sheds" to store automobiles. In 1910, a room at the St. James could be had for just one dollar per day!
